## Stable Your Cattle The Superior Way

The SUPERIOR, the only adjustable stanchion in the world that you can adjust to tie from your smallest calf to your largest export steer. YOU will admit that the steel stall and stanchion is in every respect proferable.

steel stall and stanchion is in every respect preferable to the old style stall. It is the steel stall and stanchion that YOU want in your sta-ble—and that you want to be the most modern to be had, at a modern price.

The principal parts of a sanitary stall are the mangers and the stanchions. If the manger is wrong, you are slightly inconvenienced, but if the stanchion is wrong, everything is wrong.

SUPERIOR Stalls and Stanchlons are down to a standard. No trappings and fixings—just what is necessary, and no more. The SUPERIOR Adjustable Stanchion is in a class by itself. It

The SUPERIOR Adjustance standards in a class by itself. It is complete, rotating, noiseless, has either wood or steel side bars, and can be adjusted from 5 inches to 10 inches.

The SUPERIOR Standard Standhon is absolutely cow proof,

complete rotating, noiseless, and all metal.

SUPERIOR Managers are everlasting, convenient and perfectly assistary; they give no obstruction to air or light, they provide for any method of watering, individ-

ual feeding, etc.

Our book on SUPERIOR quipment is free. Drop us a card for your copy now.

When you want a Litter Carrier, write US.

All SUPERIOR Goods are original and genuine, and acknowledged to be the most practical and modern.

## A First Prize Farm

(Concluded from page 3)

one will find on many hundreds of Ontario's better farms. Everythi Everything and homelike. Vines and flowers make

about the house, nowever, is very cas, and homelike. Vines and flowers make it attractive, and a good sized lawn, neatly kept, and hedges trimmed and kept within the proper bounds, and many maple trees along the rongeries close by, give this home a pleasing setting and about that the people living there appreciate the value of these real things in life.

Quite as one would expect of Mr.

farms elsewhere can be found but would in some one or two particulars be considerably ahead of Mr. Paterson's, but in the real worth-while things, which count, and as reckoned with in the score card, Mr. Paterson's farm was unusually mraignowerthe. farm was unusually praiseworthy, as indeed it had to be to score the high

indeed it had to be to score the high place it received.

Other than the several things al-ready noted in connection with good workmanship and the pleasing ap-pearance of things about this farm, special mention ought to be made of the painted buildings. The barns and

The Stamp of Farm Horse that Mr. Patterson Favors

This mare is one of four kept at a double profit by Mr. W. A. Paterson, the first prize farmer, whose farm and methods are described in the adjoining article. The background of this illustration affords wise and partial rear view of Mr. Patterson's house.

—Thoto by an editor of Farm and Dairy.

we found them included: Corn, 8 acres; mangels, 3 acres; turnips, 2 barley, 16; fall wheat, 13; carrote, three-quarters of an acre; hay 31 acres. Only a limited area as reservations. acres. Unity a limited area is reserv-ed for pasture, advantage being taken of roadside pasture and con-siderable feeding of soiling crops is practised within the stable.

These crops are grown in rotation, the grain following roots and corn, and the land being seeded down and and the land being seeded down and left two years, then grain following for three years. We were not par-tial to this rotation, but Mr. Pater-son said that he found it impossible to get over his place any quicker. He draws out all manure in the winter time, placing it on the land for roots and corn.

Potatoes are quite an important crop with Mr. Paterson. He likes to put them on a clover sod and plants them following the plow, which is set to run as shallow as can conveniently be turned.

SCORED ON ALL-ROUND HIGH AVERAGE There are many things about Mr. Paterson's place that we should like outbuildings are painted red with white trimmings, the farmstead thus being an additional worth-while touch which makes it noteworthy to the passerby and pleasing to the people at home who are constantly about and in sight of the buildings.

Would that many others might emulate many of the things as they are to be found and as we have noted them on this first prize farm!—C. C. N.

## Item of Interest

At the convention held recently the Ontario Vegetable Growers' Ass. ciation a strong resolution was pass ed urging upon the immigration authorities, both of Ontario and the Dominion, to endeavour to get a large emigration of skilled laborers for maremigration of skilled laborers for mar-ket gardeners and vegetable growers. If this is not done the market garden-ers and vegetable growers and farm-ers of Ortario will be unable to supply the demand for their produce. This question is being brought before the authorities, both at Ottawa and Toronto at once.
