

### Costs You Nothing

to try this wonderful new Aladdin coal oil mantle lamp 10 days right in your own home. You don't need to send us a cent in advance, and if you are not perfectly satisfied, you may return it at our expense.

### Twice the Light on Half the Oil

Recent tests by noted scientists at 14 leading Universities, prove the Aladdin gives more than twice the light and burns less than half as much oil as the best round wick open flame lamps on the market. Thus the Aladdin will pay for itself many times over in oil saved, to say nothing of the increased quantity and quality of pure white light it produces. A style for every need.

### Over Three Million

people now enjoy the light of the Aladdin and every mail brings hundreds of enthusiastic letters from satisfied users endorsing it as the most wonderful light they have ever seen. Such comments as "You have solved the problem of rural home lighting"; "I could not think of parting with my Aladdin"; "The grandest thing on earth"; "You could not buy it back at any price"; "Beats any light I have ever seen"; "A blessing to any household"; "It is the acme of perfection"; "Makes my light look like a tallow dip"; etc., etc., pour into our office every day. **Good Housekeeping Institute**, New York, tested and approved the Aladdin.

### We Will Give \$1000

to the person who shows us an oil lamp equal to the Aladdin (details of this Reward Offer given in our circular which will be sent you). Would we dare invite such comparison with all other lights if there were any doubt about the superiority of the Aladdin?

### Get One Free

We want one user in each locality to advertise and recommend the Aladdin. To that person we have a special introductory offer under which one lamp is given free. Just drop us a postal and we will send you full particulars about our great 10 Day Free Trial Offer, and tell you how you can get one free.

### Questions and Answers. Miscellaneous.

#### Breeding.

I am living in an incorporated town, and keep an entire horse, which I use for breeding purposes. During the season I use him in a high enclosure, which, although not roofed, is still entirely out of sight from the public. This enclosure is on my own property, and is about forty feet from the nearest dwelling-house. All doors are kept closed, and every thing done as far as possible to avoid disturbing the public.

1. What is required by statute in a case of this kind in a town or city?
2. Can the Council of said town pass a by-law to prohibit the use of a horse breeding a mare inside of the corporation?

J. J. A.

Ontario.

Ans.—1. The Municipal Act, Revised Statutes of Ontario, 1914, Chap. 192, Sections 250 and 399, empower municipal councils to regulate such matters, by by-laws, and enquiry should be made of the Clerk of the local municipality as to any such regulations.

2. We think not.

#### Cripple Pigs.

Pigs four months old are becoming unable to walk. Their legs are twisting out of shape, and they seem to be suffering quite a lot. They are in a warm, dry place. I have been feeding them on buckwheat porridge and boiled potatoes mashed with middlings, with very little milk. Please let me know, through your paper, if anything can be done for these. Also what other feed to use.

J. W. M.

Ans.—This trouble may be due to lack of exercise or digestive trouble. If possible give these pigs some exercise if they are at all able to walk. Purge them with about five ounces of Epsom salts, and follow with five to ten grains nux vomica twice daily. Feed lightly on milk, bran and raw roots, until they recover, then gradually increase the food. After they have recovered, feed more heavily of middlings and less shorts and buckwheat. Feed a little of equal parts Epsom salts, sulphur and charcoal every day. It is sometimes a lack of mineral matter in their food that causes them to become disabled in this way, and bone meal, charcoal, salts, and such matters should be before them at all times.

#### Rations for Cows.

1. In January 7th issue you publish, on page 30, rations for dairy cattle. In it you advise 40 pounds of silage. Do you consider that amount enough for all cows? I have silage, mixed grain, chop (oats and barley), and mixed red and alfalfa clover hay. All kinds of feed are available, such as corn chop, cotton-seed meal, bran, brewers' grains (dry) and oil-cake meal. Please compound a ration, using any or all the foregoing for cows in full milk. I would like the ration to keep the cows in good flesh as well as produce milk.

2. Please also state ration for cows not in milk for six weeks previous to freshening, using silage and oat straw as a basis?

Ans.—1. Forty pounds of silage is more than some cows will consume, others will eat more. It is a matter of individuality, and without experience with the animal in question, it is difficult to recommend a ration that will exactly suit. Hay, 10 lbs.; silage, 40 lbs.; cotton-seed meal, 2 lbs.; chop (oats and barley), 4 lbs.; and bran 4 lbs., should make a suitable ration for dairy cattle in the absence of roots. It contains approximately 27 lbs. of dry matter, and there may be individuals in the herd that will not consume the total quantity per day. However, the proportions are in keeping with good feeding, and the cows should maintain their flesh as well as they may be expected to do during lactation.

2. Dry cows should be fed liberally so they will be in condition to produce during their next period of lactation. The hay and cotton-seed meal may be dropped from the ration already given, and oat straw substituted. Cotton-seed meal is advised here on account of its present reasonable price on the market. If the straw is not of good quality, we would recommend a small feed of hay each day in addition.

THIRTY HEAD

### High-class Holsteins

All young stock and sired by Count Hengerveld Fayne De Kol, Dutchland Colantha Sir Mona and King Canary Segis. All stock in milk have official records and come from official record dams.

Count Hengerveld Fayne De Kol has now 20 R. of M. daughters, five of them averaging over 20 pounds, and one is a 24.5-pound three-year-old. His sire is the only bull in the world with 13 daughters averaging over 100 pounds of milk each in one day.

Dutchland Colantha Sir Mona has three daughters in milk, and these have made good records, one over 17 pounds as a junior two-year-old. This bull is a full brother to Dutchland Colantha Mona, the three-year-old world's champion for yearly milk production.

### DON'T MISS THIS SALE!

Remember, the offerings are all young and sound, and each is backed up by the reputation that the LAKEVIEW HERD is trying to make for itself.

Terms: Cash or 6 months' credit on approved notes at 6%.

Radial cars from Hamilton ten minutes after each hour for Trafalgar, returning half-past each hour for Hamilton. G. T. R. from Toronto for Bronte 6.20 a.m. and 12.15 noon, returning 6.04 for Toronto.

## Norfolk Holstein Breeders' Annual Club Sale

SIMCOE, ONT.

Thursday, February 11th, 1915

## 50 HEAD PURE-BRED HOLSTEINS

\*On the morning of the sale all cattle will be inspected by an impartial inspector, to assure prospective purchasers that every animal offered is sound and right. No three-teaters nor shy breeders may be listed by consignors. All cattle not tested for tuberculosis previous to day of sale by a competent vet. must be sold subject to tuberculin test. Now is the time to part with a few grades, and lay a foundation in pure-bred Holsteins.
