### Then Dr. Williams' Pink Pills Wrought a Lasting Cure.

Dr. Williams' Pink Pills have made on many remarkable cures in serious cases that people are liable to over-look their value as a tonic for the debility and ditions. That general run-down conditions. such conditions are the cause of misery and unhappiness is fully known to those who suffer from them and the reed of curing them is as vital as is relief from diseases with higher sounding names. We commend the following statement to any one suffering from weak, thin blood, or shattered nerves. Mrs. Mae Macabe, Gleichen, Alta., says: "A few years ago I became run down, not ill, but just tired and weak all the time. I consulted our family loctor, who gave me tonic after tonic, with no effect. I gradually got weaker and weaker until I could not do my work. Then I went to another of decline, and recommended a warm er climate, with complete rest. This I could not afford, and I began to worry and fret until I became a complete nervous wreck. One day, while visiting a neighbor, an old gentleman who was taking Dr. Williams Pink Pills for partial paralysis re-commended them to me. I sent out and got three boxes, but without much faith that they would help me, but before they were gone I noticed an improvement, and I continued taking the Pills, constantly growing stronger, until I had taken seven or eight boxes, when I was completely cured. I could do my work as easily as ever I had done in my life, and the doctor told me that he could scarcely believe the change in me, as he had not had the least hope that I would be strong again. Now I always keep the Pills on hand, and if I feel fatigu weary take them for three or four days,

so as not to get run down."

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50, from The Dr. Williams Medicine Co., Brockville, Ont.

### BEST ENGLISH.

The first essential toward the accur-English is to know the real meanings of words, and then to choose the right one to express the idea. Whatever is expressed to English-speaking people should be in the English tongue, with no foreign phrases introduced. It is always better form to use the familiar names of familiar things and adeas, to use simple Englo-Saxon words that belong less to literary language than to living speech and are more than to living speech, and are more readily understood, than the longer words of foreign origin. A short word saves time for both writer and reader, and our ordinary speech should not be burdened with the high-sounding words necessary for the 'treatment of most

subjects remote from ordinary events and simple feelings.

Let us, therefore, "read" the morning Let us, therefore, "read" the morning paper, and let the pedant "peruse" it. Let us "see" the beauties of the sea, and sky, and not "discern" or "witness" a sunset. Let us "build" a "house" and make of it a 'home," allowing a crown prince to "erect" a "residence." Let us "oversee" our household, not "supervise" it. Why should we drop us hearty vise" it. Why should we drop so hearty a word as "kinsman," adopting the vague and misty substitutes of "relation" and "connection," forced upon us by elegant people? Nothing is gained and much is lost, for the latter are both general terms. Men have relations of various kinds, and connections are of still wider distribution, whereas a man's kinsmen are only those of his own blood. -New York Times.

## PREVENTS ACCIDENTS.

A device which prevents a railway carriage from being started when a passenger is mounting or dismounting is being tested on the line of the Portland being tested on the line of the Portland railway, Light and Power Company, Portland, England. It consists of a hing-ed step which is depressed about one-half inch when a weight of from five to ten pounds is placed upon it. This breaks an electric circuit connected with the contactor, so that the contactor fails to close. The device is arranged, however, so that the motorman is able to reverse the carriage, regardless of the condition of the step.

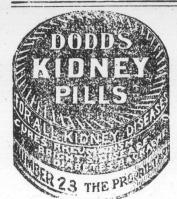

## IKU'S DEPARTURE.

The departure of the arch-criminal iku com Pekin to exile is described as rival ling in solendor that of the most distin guished enjoy to foreign parts. All the unoccupied great ones of Pekin "saw him off": he took four cooks and twenty servants with him, and left behind with each servants' family a solutium of fift ounces; moreover, each servant had to "sign on" and secure "bail" for good behaviour. "It pays to be a traitor." From the Westminster Gazette.

## CAUGHT BY THE RECOIL.

"Already this suffragette movement is causing the tables to be turned," remarked Mr. Meekton.
"In what way?"

"My wife is making all kinds of sneer-ing allusions to the price I paid for my the Manama hat."—Washington Star.

### Girl Penetrates Africa to Place a Stone on Her Lover's Grave

After traveling for months through lately returned to England from the per-

African country naver before traversed by white womar. Once MacLeod has lately returned to England from the perilous region where a year ago her affianced husband, Capt. Boud Alexander. Was killed by savages, and where, five years before, he had buried his brother, Cnpt. Claud Alexander.

Miss MacLeou made this dangerous and adventurous trip that she might place a stone on the unmarked grave, where the young explorer was laid after his body was recovered from the scene of his death. In her journey she covered 3,700 miles, mostly on foot and horseback. Sometimes she waded knee deep through jungle swamps for hours. She discovered the mysterious falls of the Mao Kabi, and the French, in admiration of her energy and daring, named them after her. Whise she and her two companions, Mr. and Mrs. R. A. Talbot, arived at Lere, they learned that no Europeans had yet succeeded in finding these mysterious falls, which are mentioned in Comandant Lentant's book, "La Grande Route du Chad," and are asserted by the natives to be devil haunted and guarded by troops of giraffey—the devils, to keep the natives away: the giraffes, to lure Europeans away and entice them from the spot.

FALLS NAMED FOR GIRL.

They found M. Bertaut, the resident of the district, was desirous of discovering the falls, and they departed from the mapped out route of their trip long enough to discover them, in spite of the obstacles placed in their way by the natives. The latter declared that the falls had been seen for the first time by mortai eyes. M. Bertaut named the falls approve his order. The falls are notable in that they are the chief obstacle to a navigable waterway between the ocean and Lake Chad.

The daring young Scotchwoman is the deughter of Sir Reginald MacLeod, late permanent undersecretary for Scotland. Capt. Boyd Alexander was a British army officer, who, though not much past thirty, had won an enviable name as an explorer. The Royal Geographical Society of Antwerp gave him a gold medal, the Roya algour she was a gold medalist of the Roy

Before he had became a captain, he had led a scientifi expedition to the Cane Verde Islands. After that he spent a year in the African jungle, and explored the Zambesi River for its entire length.

As a soldier he participated in the relief of Coomassie. An exploring expedition to Fernando Po, which he headed, was succeded by a three years' exploration of Africa from the mouth of the Niger to the Nile.

A SHORT LIFE BUT A MERRY ONE. His colleagues in the leadership of the expedition were Mr. Talbot, the same who accompanied Miss MacLeod last year to the Lake Chad region to find and mark Alexander's grave, and Capt. Claud Alexander, Boyd's brother, and himself a dauntless and celebrated explorer. The hardships endured on the trip were such that Claud Alexander fell a victim to them, and Boyd burled him at Maifonti, where his own grave now is.

Claude Alexander died November 12th, 1991, and his her words to Roude Alexander died November 12th, 1991, and his her words to Roude Alexander died November 12th, 1991, and his her words to Roude Alexander died November 12th, 1991, and his her words to Roude Alexander died November 12th, 1991, and his her words to Roude Alexander died November 12th, 1991, and his her words to Roude Alexander died November 12th, 1991, and his her words to Roude Alexander died November 12th, 1991, and his her words to Roude Alexander died November 12th, 1991, and his her words to Roude Alexander died November 12th, 1991, and his her words to Roude Alexander died November 12th, 1991, and 1991

him at Maifonti, where his own grave now is.

Claude Alexander died November 12th, 1904, and his last words to Boyd Alexander, "A short life, but a merry one," show the spirit in which these brothers took their perilous labors in the wilds. Claud was an officer in the Scots' Guards, Boyd of the Hifle Brigade. Around Claud's grave Boyd set a wall with native spear heads set around the top. It was three years after he had buried his brother that Boyd Alexander reached civilization again.

The survivor escaped with his life, but a logh, recuperation in England was ne-

a long recuperation in England was ne-cessary. If was while he was resting from his belors and adventures that he thet Miss MacLeod. After a short court-

from his moors and adventures that he fact Miss MacLeod. After a short courtship they became affianced.

In 1906 the captin left for Africa again, with the understanding that upon his return they were to be married. He penetrated into the dangerous and hostile country to the northwest of Lake Chad. That famous lake is on the northwest coast of Africa, a thousand miles from the mouth of the Niger.

PUTS STONE ON HIS GRAVE.

The last post of white men in the Lake Chad is Malfonti. It was just a little over a year ago that Capt. Alexander left this outpost and vanished into the regions of the savages. A month later two of his black servants, the only survivors of the expedition, succeeded in getting back to the post and told of a battle in the jungle, in which Captain Alexander had put up a desperate resistance against the Wadal, a savage tribe inhabiting the country. An expepedition was promptly sent out from Malfonti and suceeded in recovering the

Maifont and succeeded in recovering the body.

When word of this was carried to England, Miss MacLeod demonstrated that she was a fit bride for such a man. She at once amounced that she would go berself to the Lake Chadi region and blace with her own hands a stone on the captain's grave. Despite all efforts to dissuade her, she, with Mr. and Mrs. Talbot, set out on the journey. She was received with honor everywhere; a military funeral was given Captain Alexander, and Miss MacLeod placed on his grave the stone she had carried so many thousand miles.

At one point she crossed the Kerri-Kerri country, where are the remarkable fortress hills inhabited by a race, which, in its own words, "lives for fear" at the coming of the whites.

The flies that are now in your kitchen and dining room were probably feasting on some indescribable nastiness less than an hour ago, and as a single fly often carries many thousands of disease germs attached to its hairy body, it is the duty of every housekeeper to assist in exterminating this worst enemy of the hu-man race. Wilson's Fly Pads kill flies in such immense quantities as cannot be approached by any other fly killer.

## DISTANCE TOLD BY WIRELESS.

Making use of the difference in the traveling time of a wireless message and an audible signal, a system has been recently devised whereby it is pos sible to secure, with reasonable accuracy, the distance of the source of the signal. It is well-known that sound or-dinarily travels at the rate of 1,123 feet per second, while the wireless wave traper second, while the willness are second, rels at the rate of 186,000 per second, short distances the difference At very short distances the difference in the sounds woud be so short as to be ndiscernible, but a chart with another piece of apparatus has been devised by ounds can be arrived at with a fair degree of accuracy and the method will be especially valuable in aiding the master of a vessel to arrive approximately at his position in a fog.

In Memory of Woman Astronomer A fund of \$25,000 has been established in memory of Meria Mitchell, the pioner woman astronomer, who had her first observatory on Nantucket Islandthe income to be used to provide for a yearly fellowship for some woman astronomer. The candidates will be selected by competition, and the winner will be entitled to several years of study here and the Lat.

A Young Woman-Scarcely Thirty—Seemed to be Dying on Her Feet.

DR. HAMILTON'S PILLS CURED

"I think it should be the duty of the schools to teach children how to the schools to teach children how to keep well," writes Miss Nannie E. Naydon, a well-known and highly esteemed resident of Bristol. "Ignorance of the laws of health and the use of improper remedies destroyed my vigor and led me to the verge of invalidism. I was as a girl ruddy and strong. Nothing seemed to affect me until I was about thirty. Then gas began to form in the stomfect me until I was about thirty. Then gas began to form in the stomach. I suffered with bloating and a general failure in strength set in. If I went upstairs my breath hurt. My system was very irregular and until I grew pretty bad I didn't pay much heed to my condition. Then I got blue, worried all the time, wakened in the night and couldn't get to sleep again. None of the medicine I took helt, I me. One day I was reading of a very interesting case like mine cured by Dr. Hamilton's Pills. I took the same treatment. It was just right—didn't physic me to death, but took hold of the weak, sick parts of my system and set things right. It seems as if Dr. Hamilton's Pills have made me young again and all my color, spirits, vigor and health of former days have returned to stay."

Every girl and woman should use Dr. Hamilton's Pills regularly. They help a woman in many ways. Bebr. Hamilton's Pills regularly. They help a woman in many ways. Beware of the dealer who asks you to take an inferior pill on which his profit is larger than on Dr. Hamilton's. ## IN THE PHILIPPINES.

One of the Hottest Fights in General Funston's Career.

In order that I might be able to exereise some influence on the firing line as a whole, and not get mixed up in a local fight where I could see only one or two companies, I remained about two hundred yards behind the line for the time being. Here I was joined by the well known correspondent, Mr. Jas. Creelman. I had sent Sergeant-Major Warner and Trumpter Barshfield away to carry orders, and was glad to have company. The noise was so overwhelm-ing that it was difficult to think, for the whole brigade was fighting as hard as it could and the woods were filled with the roar. Creelman and I sat on our borses for a while, and then unanimously dismounted, the idea seeming to strike both us at the same time. Com-panies E and H had struck the worst panies E and H had struck the worst of it, being opposite the most formidable trench, and Creetwan and I were directly behind them. A natural tendency of the Filipino, and for that matter, most people, to shoot high madour position one of the warmest places I have ever been in. Only once, and that at Cascorra, in far-away Cuba, had I seen bullets thicker. The two companies were right on the river bank, companies were right on the river bank, and as the stream was not more than forty feet wide, and the Filipino trenches were on the opposite bank, the two firing lines were not more than fifty feet apart. The river looked deep.

but as yet our people had not overcome the enemy's fire sufficiently to allow the matter to be tested. Captain Adna G. Clarke, now a captain in the regular army, was in com-mand of company H, and I could see him standing erect in order to better direct the fire of his men, who were lying down. In a short time I saw him lying down. In a short time I saw him crumple up and go down with a wound from which I believe he has not fully recovered to this day. Majors Metcalf and Whiteman were close up to the river bank, their two battalions being most hotly engaged.—From "Up the Railroad to Malolos," by Brig.-Gen. Funston, in the August Scribner (fic-
