Toronto, April 29.—The local sterling exhange market is reported as follows:—

RATES IN NEW YORK | Posted. | Actual | St.87 to | \$1.86 to \$1.86 t Open market discount rate 13 per cent.

ON WALL STREET. Press Despatch.

The duliness of the stock market today has not been equalled for many
months, but there was firmness manifest in prices, and an undercurrent of strength that refused to yield to some very dis-corraging circumstances. The total trans-lections on the exchange fell considerably corraging crecumstances. The total transactions on the exchange fell considerably below 100.000 shares, and only three stocks—Chicago Gas, Sugar and Burlington—were dealt in to exceed 10.000 shares. The market for Americans in London also was dull and neglected, and even the professional traders found little to interest them. There is no doubt that the partial suspension of trading was partly due to the uncertainty regarding the dimensions likely to be assumed by the gold export movement. Experts differ as to how far the gold movement is due to the premium on gold in London, and how far to ratural trade conditions. The new announcement do-day that a further shipment of gold will be made next Tuesday to the amount of \$500,000 by a Boston house shows that the fall in the exchange rate to 4.87½ for demand sterling was not low enough to prevent shipments, although it is 1½c below the point which exchange houses agreed upon last week as necessary to assure them sufficient profit to make it wouth while to ship gold. The effect on the stock market was sentimental to a barge extent, it having become a habit to assure them sufficient profit to make it wouth while to ship gold. The effect on the stock market was sentmental to a large extent, it having become a habit during the period of the depleted gold reserve, which accompanied the last outward gold movement, to sell stocks on every announcement of exports of gold. Notwithstanding the partial stagnation of trading, the net result of the day's trading was an average gain of a fraction, and the upward movement of stock was only interrupted by depression in special stocks. New Jersey Central was one of these, and it declined 2½, recovering only 3½. The other coalers showed the most marked decline in sympathy. W. U. was also heavy in the early dealings, but more than recovered the loss. Baltimore and Ohio sagged 1½ on the issue of additional certificates, and rallied 3½. Chicago Gas fluctuated irregularly over a range of 1½, but ended with a net gain of ½. The clesing was quiet but firm, and a shade off from the top prices. The bond market ruled firm on the moderate dealings. The aggregate sales were \$917,000. Government's displayed an improved tone, and

gained slightly on light purchases. The crunsactions were \$1,400.

The Evening Post says:—Although no purchases were made in our market on arbitrating account, the general tendency was firm. There was, however, hardly any business done, and the day's total transactions were quite insignificant. The transactions were quite insignificant. The coal shares, as a rule, vere heavy; most of the industrials advanced, and both these movements, which made up most of the business of the day, illustrated how little influence European news exerted. Another half million gold was ordered for Great Britain, but a fractional recovery in foreign exchange suggested that the "gold bills" were not being pressed at current rates. Three interesting facts in the day's advices, not unconnected with

current rates. Three interesting facts in the day's advices, not unconnected with this specie movement, were the increase in the gold reserves reported in their weekly statement by the binks toth of England and France, the returning firmness in the continuance of gold withdrawals from the Bank of England for Japan. LONDON STOCKS AND MONEY. London, 'April 29.—American securities declined somewhat at first, but stiffened later in sympathy with English stocks. The closing tone was steady, and the demund generally light.

N. 447s.
London, April 20.—The stock markets were good to-day, and the closing was quite at the best. The chief factor was the report of a speedy intervention by the powers, and the report mainly arises from the marked strength of the foreign bourses. The main feature here is the sharp rise in home rails, and the recovery of Kaffirs, the latter being induced by the fact that the true position of the Gold Fields Company has apparently now been made known. Americans were ir-

been made known. Americans were irregular and neglected. There was a further rise in Canadian Pacific. MORE GOLD FOR EUROPE. Boston, Mass., April 29.—Kidder, Peabody & Co., bankers, of this city, have engaged \$5.0,000 in gold for shipment to Germany by steamer Lahn from New York, Tuesday, May 4. By private wire to F. H. Butler, Broker, Chicago, April 29.—Wheat—The Cincinnait Price Current seems to have dependently not be a studied. It declares 300,000,000 bushels represents the extent of the present indications for vinter wheat, while the situation in the North-west is uncentain, but not hopeless. A few cars of forceful weather is urgently needed to avert disaster. Frost up there is predicted for to-night, and for other states south. Of course, we may get warm, dry weather, premitting the finish of sedding, in a week or ten days. To stry the least the situation is more or less critical. Cash business done at the seaboard yesterday was large. Seaboard stocks aggregate only 1,500,000 or less critical. Cash business done at the seaboard yesterday was large. Seaboard stocks aggregate only 1,500,000 bushels last Saturday. The grain is moving from Dubuth and Chicago moderately, and shipments from primary markets exceed the receipts. Reports from San Fruncisco as to the crop are discouraging, hot winds doing serious injury. We have been bearish for some lays, but yesterday advised the purchase on all soft snots. The price was broken to 69½c for July this morning on a sharp raid by several prominent local bears, but as soon as they quit selling the market reacted, those who have taken our advice mide good money for the first half of the week on the short side, and think they will find the long side nearly as profitance on seft spots.

en soft spots.

Provisions—Prices were easier at the opening on lower hog market, but repeted sharply later on good buying of the Mad pork. Lard has not been so buoyant as other products. Armour has evidently been on the selling side for several days, but is thought to have been upying for several days. The Cudahys have been puying for several days. There is good enquiry for cash stuff.

There is some improvement in the trade situation at Toronto, and many look for a steady increase in volume now that the tariff is settled. Capital is likely to find its way again into business channels, and commerce will expand. Generally speaking, the new eariff has been accepted with satisfaction. The cotton manufacturers look upon it favorably, and prospects are considered bright in this line. The woolen trade is somewhat under a cloud, owing to recent large failures. The interfere with prices of coarse considered bright in this line. The inability of dealers to sell at a profit.
