

Lowe Brothers

This paint film is less than 1/100 of an inch thick. What does that mean to you?

When you stop to realize that a two-coat film of paint is less than 1-100 of an inch in thickness, and that this thin film stands between your house and the weather, you can see the wisdom of buying the right kind of paint.

Lowe Brothers High Standard Paint forms a tougher film than any other paint we know of. It is elastic. It will not crack with the weather's changes. It is both weatherproof and waterproof.

It costs a little more than most paints, but it always covers more surface, therefore less paint is required and you actually save money at the very start. This fact, coupled with its long lastingness, makes it really an investment paint.

If you want to prevent future trouble, come in and talk over your paint problems with us.

To make larger loaves from the same quantity of flour, and more loaves per barrel, use Purity Flour, the flour with the full strength of Western Canada Wheat. Just as good for cakes and pastry as it is for bread.

PURITY FLOUR
"More Bread and Better Bread"

More than just materials

When you let us supply your building needs you get a great deal more than just so many feet of lumber—bundles of shingles—pounds of nails—or panels of Beaver Board. You get the benefit of our building material knowledge and experience in Service that helps you get the results you want at the right price. Service first in planning the work—more service in selecting proper materials—speedy service in delivering the goods.

You pay for the materials. The service pays for itself in the larger volume of business it brings through super-satisfied customers.

It will pay you to be one of them.

Come to us for Service

ANTHRACITE COAL—1921

To those who are hoping for lower prices:

We are in the coal business. We believe we know conditions. We cannot predict future prices. We do not think further reductions are likely. Present mine wage agreements don't expire until March 31, 1922.

There isn't much hope of general reductions in freight rates. If the proposed Pennsylvania State tax on anthracite becomes a law, this will mean an additional 15.30 or even 25 cents after next July 1st.

Coal is far cheaper today than it will be next winter if you hold off buying! That is absolutely certain. You received the same advice in 1919—those who took it suffered no hardship of consequence during the big anthracite coal strike.

We are simply appealing to your common-sense.

You insure your house against fire, don't you? Not because you expect fire, but as a protection in case a fire loss occurs. The best insurance you can buy now is fuel insurance—you don't know what's coming next winter.

The Real Estate interests of Montreal recently had a survey made, with a resulting recommendation that coal be bought now, and stored to the limit of facilities.

The Manufacturers' Record of Baltimore says: "Protect yourself at once for all family and factory coal needs."

We say: "Buy your coal now—take reasonable quantities throughout the winter and summer. In this way, you will avoid an excessive demand (like last fall), and a shortage with high prices next winter. There, if unusual conditions arise in the winter, who can measure the value of the coal already in your cellar?"

Call us up—we'll work with you.

R. K. SHIVES - Coal & Insurance.

It's the characteristic fragrant aroma of MASTER MASON that has made it so popular with discriminating smokers. But it has other qualities: it burns longer, holds its fire better and is sweeter than most pipe tobaccos.

Smoke Master Mason
It's good tobacco

MASTER MASON—ready rubbed—for those who like it that way is the same good plug tobacco cut and rubbed ready for the pipe—It is put up in tin foils and paper packages.
