A PROPERLY TRIMMED FRUIT TREE

Mr. H. W. Green, writing to the *Rural New Yorker*, says his Dwarf Duchess Pears paid him twelve times as much as his apples, and that there was more money in pears at \$1.00 per barrel than apples at \$2.00. He has an orchard of 3,000 Dwarf Pear Trees.

R. T. Austin, near Boston, Mass., set out 500 Dwarf Pears, occupying about an acre of ground. They commenced bearing in three years and have borne regular crops ever since. An account kept of the sales for a period of six years showed an aggregate amount of \$3,498 00, an average of over \$500.00 an acre each season.

Why You Should Plant Plum Trees

For several years old plum orchards have been pulled out or neglected, and no new ones put in to take their place. There will be a scarcity of this fruit in a short time. Heed our warning and put out plums this Spring. We have Red June, Abundance, Burbank, October Purple, and all leading European kinds. An orchard of 50 or 100 trees will pay big in a very few years.

PROFIT IN DWARF PEARS

The English market absorbs tons of Duchess Pears every year. This variety does best on Dwarf stock, and they can be set 10 feet by 10 feet and 435 to the acre. See how profitable others have found them:
