# COE'S

IT CAUSES the Seed to germinate quickly, and gives at once a healthy and vigorous growth to the young plant. It drives away the Insecta. Where this Phosphate is used there is rarely any occasion for a second sowing of seed. The yield of the crop will be increased wonderfully and the quality unsurpassed.

Mr. C. S. Dednas, of Northumberland Co., 83/8:—

I used COE'S Super-Paosphate of Lime on my land for Swedes, and found it answered my fullest expectations; the crop was the best I have ever raised. I used it on every other drill, the Swedee on which the Super-Phosphate was used were in the rough leaf some days before the rest of the crop, thereby Escaping the Fly which destroyed a large proportion of the rest of the crop.

#### CARD OF THANKS.

MARKHAM, 87th April, 1864.

June 1, 1864.

TO THE EDITOR OF THE CANADA PARMER—I have taken the liberty, through your valuable paper, to thank the Directors of the AGRICULTURAL MUTUAL ASSUBANCE ASSOCIATION OF CANADA for the prompt and satisfactory payment of my calim, for the destruction of my extensive barns, stables and contents, amounting to eighteen hundred and fifty dollars. I am glad to say I had no trouble is gotting my monoy, and I shall feel it my duty to recommend it to all farmors in Canada, in preference to any other Company.

GRORGE MILLER

I beg to inform the farmers of York and Ontario Counties that I still continue to hold an office at Markham Village for the above Company. This Company has always avoided Shops, Stores, Taverns, and risks of that sor! I has become the largest institution of the kind that over existed in Canada. It has nearly 24,000 Policies in force, and it is, moreover, by far the chespest;—it never cost members more than 25 cents each year on the hundred deliars. During the last four years, no Company in this country can say 25 much.
