

PERFECTION ATTAINED!

DR. C. L. COULTER'S

COMBINED

VAPORIZER and INHALER

THE CHAMPION VOLATILIZER.

A New Instrument for Vaporizing Oils and Drugs for Inhalation as well as for Disinfecting and Deodorizing Sick Rooms, Hospitals, Public Buildings, Railway Carriages, etc.; also an Odorizer for Perfuming Parlors, Opera Houses, etc.

The only perfect Vaporizer for the treatment of diseases of the Nose, Throat and Lungs, such as Consumption, Bronchitis, Asthma, Whooping-cough Croup, Diphtheria, Catarrh and La Grippe Beechwood Creosote, Oil of Southern Pine Needle and Eucalyptus Oil, of each equal parts, vaporized and inhaled, affords wonderful benefit in Phthisis.

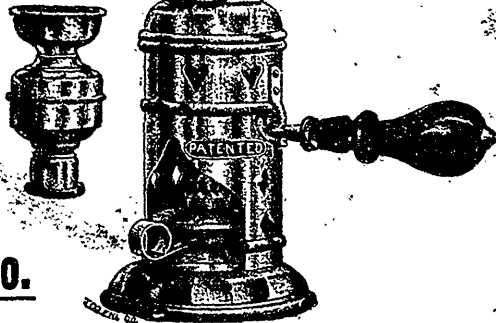

Made of Copper and Brass, Nickel-plated. It has no Glass Tubes, no Valves to get out of order.

PATENTED.

Canada.....Oct. 10, 1890
United States.....June 9, 1891
Great Britain.....May 1, 1891
France.....June 9, 1891
Other foreign patents applied for

Perfumer and Deodorizer Attachment.

Price \$5.50.

ADVANTAGES:

- 1. An undiluted, non-irritating, thoroughly medicated vapor is obtained by reason of the reservoir containing the medicated sponge being placed on the inhaling tube at a distance of 8 or 10 inches from the boiling water, and complete volatilization is effected of the drugs to be inhaled, thus ensuring their reaching directly the part to be medicated. Other so-called vaporizers are only atomizers or sprays, breaking the drug into fluid particles which are not diffusible and therefore too heavy to be inspired.
2. By vaporizing antiseptics, it quickly sterilizes the atmosphere in cases of infectious diseases.
3. It is simple, durable, convenient of manipulation, and absolutely safe from fire.
4. The price is a great desideratum, being only about half that of any other vaporizer, volatilizer or inhaler that claims any merit.
5. It is the only volatilizer that is unanimously endorsed by the medical profession (read sample testimonials):

C. L. COULTER, M.D., Past Chief Ranger and Physician to Court Lindsay,

OFFICE OF THE EXECUTIVE COUNCIL INDEPENDENT ORDER OF FORESTERS, Toronto, 27th November, 1891.

My DEAR SIR AND BRO. - I have tested and am using your Combined Vaporizer and Inhaler and am very much pleased with the manner it does its work. In fact, I regard it as a perfect instrument, being safe, simple of construction, and therefore not liable to get out of order. It accomplishes the vaporization of oils and other medicinal agents most effectually, thus making it available as well for treatment by inhalation as for disinfecting sick rooms, hospitals and public buildings, or wherever disinfection is required. I have had experience with most of the best Inhalers in the market and your instrument has given me more satisfaction than any I have ever used, and I can with confidence recommend it to the profession and the public generally. Yours in L. B. & C., SYLVATEKHA, M.D., Supreme Chief Ranger I. O. F. Infectious diseases.

Very useful in sterilizing the atmosphere of a room. G. R. McDONAGH, M.D., L.R.C.P., London, Lecturer in Laryngology and Rhinology, University of Toronto. For vaporizing the atmosphere in diphtheria it is without an equal and for the purpose of disinfecting apartments or clothing I cannot conceive anything better. FREDERICK W. STRANGE, M.R.C.S., Eng., Toronto.

I have carefully examined your Vaporizer and I am very much impressed by its simplicity and perfect efficiency in distributing disinfectants thoroughly throughout large buildings. I believe all schools would be rendered more healthful by its use in them for a short time before the opening of school each morning. It is incomparably superior to any deodorizer or disinfectant that depends on the action of the air alone for the distribution of the disinfectants used.

JAS. L. HUGHES, Public School Inspector, Chairman Committee on Hygiene, National Council of Education. Particularly useful in diseases requiring for treatment thoroughly vaporized volatile substances. SIR JAMES GRANT, M.D., Ottawa.
