

The town of Shelburne, Ont., will probably purchase the electric light plant from the present proprietors.

Mr. James S. Craig has been appointed city electrician for Toronto, as successor to the late Donald Gibson.

The engine for running the electric plant for the Toronto city hall has been ordered from the Robb Engineering Co., Amherst, N.S.

The electric light plant owned by the town of Kamloops, B.C., has been found inadequate, and steps will likely be taken to in-

crease it by two boilers of 150 h.p. each, an engine, pump, heater and dynamo. It is probable that an engineer will be engaged to report on the plant before the council takes any action.

At the annual meeting of the New Brunswick Telephone Co., held at Fredericton, N.B., on June 14th, it was decided to put in a double metallic circuit between St. John and Fredericton, and extend the trunk line from Fredericton to Chatham and along the north shore. A. A. Stackton, Charles Fawcett, Joseph Black, A. G. Blair, F. P. Thompson and W. T. Whitehead were elected directors.
