GALVANIZED STEEL BUCKETS

Something entirely new, and superior to old style Buckets, made in three sizes. They are superior to the ordinary Flaring English Bucket, being of greater capacity. They are stronger in shape, consequently more durable. They will not slop over or tip over, owing to the wide bottom. They nest very close and firm, which protects them in shipping. The rim is in one piece with the body, consequently cannot get knocked off. They are Galvanized and not lead coated.

- TORONTO -

Have decided to dispose of their well-known established business. The plant and machinery is of the latest modern description and in first-class condition, made by the best English and American manufacturers. The various departments have been lately remodelled, making this printing and bookbinding business a most desirable one to acquire.

The bookbinders' stock of leathers, cloths, marble papers, etc., have been carefully bought in the English market.

The premises contain three large flats, well lighted, heated by steam; the machinery is run by electric power, and is in every way well adapted for the carrying on of a large business.

Inspection invited. Tenders will be received for the entire running business, or for any portion of the stock, plant or machinery. All tenders must be received by the undersigned not later than the 1st day of May, 1893. For condition of sale and further particulars apply to
