

interest to all, but is aimed primarily at the U.S. market. (English, 1988)

URBAN TRANSIT

Canadian Urban Transit Systems

This booklet provides an overview of the Canadian urban transit industry which has contributed to the development of a broad range of transportation systems. From fast and silent subways to light rail vehicles, from articulated buses to paratransit, and from monorails to advanced light rapid transit, Canada has created systems that are models for transit industries and urban planners the world over. Included in this booklet are profiles of the highly successful mass transit systems of Toronto, Montreal, Vancouver, and Ottawa; and the capabilities of some of Canada's top transit equipment manufacturers and services. (English, 1986)
