

9. Detailed studies on sample collection can be initiated only after completing the present methodological development of trace analysis. Such studies are, however, of primary importance in preparing detailed instructions for sample collection for verification analysis. Miniature field tests in the open air are necessary, and are being planned. They will include experiments for remote monitoring of air and water.

10. The eight years' experience of the Finnish CW project indicates that in spite of being only a single problem in the very complex CW verification field, continuous research, such as the Finnish project, is necessary to bring the chemical verification methodology along with the rapid technical development.
