

TRADE NOTE.

The Ottawa Saw Co., although only one year in business, are taking a leading position in Canada as saw manufacturers. They report that the last year's business has been successful beyond most sanguine expectations both as to quantity of work turned out, and the general satisfaction that it has given. Their works are fitted with the latest improved machinery, and the tempering plant is the outcome of many years study and experience; the workmen are all tried and carefully selected. The members of the firm are practical saw makers of long experience in shops and mills in both Canada and United States, and they claim that their gang circular and shingle saws cannot be equalled in Canada. The Ottawa Saw Works

Co. seeing the growing demand for a high grade band saw have added this industry to their works. During the past summer they supplied a number of these saws to different mills, and the results have been so good that they will now make this a special feature of their business. They further inform us that already they have booked a number of full outfits in saws for large mills for next seasons use. They also make a specialty of repairing.

J. W. Howry & Sons, of Fenelon Falls, Ont., are reported to have sold recently 50,000 feet of cork pine lumber to a Toronto firm at \$60 a thousand, to be used in the manufacture of pianos.

OBITUARY.

Alderman Hurteau, of Montreal, who was engaged in lumbering for many years, is dead. Consumption was the cause of death.

Mr. John A. Humphrey, ex-M. P. P. for Westmoreland, N. B., is dead. He managed his father's mills at Moncton from 1845 to 1849, when he purchased the mills, and has run them ever since. He left an estate of nearly a quarter of a million.

Turkey imports large quantities of lumber from the United States. The attention of Canadian lumbermen is called to this country as a new opening for their trade.

Can your Son keep your books?

Send him for a few months to the

Dauntless Shingle and Heading Machine

∴ WILL make more Shingles per day than any self-acting machine with vertical saw in existence, and more Shingles from the same quantity of timber.

THE FRAME

... Is of Iron throughout, very heavy and rigid, strongly bolted and braced.

THE CARRIAGE

... Is very light and strong, made of forged Cast Steel Plate, running on steel ways or tracks. Will take in a block 18 inches wide and 19 inches long, adjustable for 16-inch or 18-inch shingles.

—CAPACITY FROM 25,000 TO 50,000 PER DAY—

[COPY.]

HASTINGS, Dec. 3, 1894.

F. J. DRAKE, Esq., Belleville.

Dear Sir,—We have waited two years before giving you our idea of your machinery. This we did to thoroughly test it, and can now say we know what it can do.

Your Saw Mill is equal, or nearly equal, to any we have seen of much heavier make, and far in advance of any light rig in the market. The capacity per day is fully up to your guarantee, 40 M per day. We have tested with eight men.

The Shingle Mill cannot be beaten for any kind of timber. Ours being in a manner a custom mill, we have good, bad and indifferent timber, but for all it does the work satisfactorily.

You may use this in any way you please, or refer to us at any time.

Yours truly,

(Sgd.) W. J. & H. W. FOWLDS.

(F. J. DRAKE)
