

CHATWOOD'S

**Treble Patent "Gunpowder Escapement" Intersected Steel
Fire and Burglar Proof Bankers' Safes**

Should alone be trusted with the custody of valuables.

ESTABLISHED 1855.

PATENTS DATED 1860 AND 1862.

TESTIMONIAL

"WHEREAS CHATWOOD'S PATENT SAFE AND LOCK COMPANY, Limited, of the LANCASHIRE SAFE AND LOCK WORKS, BOLTON, having, on the 13th February, 1865, submitted to be publicly tested with gunpowder, or any kind of burglars' tools, including 'steel wedges,' and the 'ratchet lever drill,' one of CHATWOOD'S double patent 'gunpowder escapement' safes, fitted with his patent 'hematite intersected' door and invincible lock, the same being a safe made for the Bank of Bolton, it was unanimously resolved by those present to witness the test, that his Worship the Mayor of Bolton, and John Hick, Esq., Engineer, be desired to act as referees. Now we, the undersigned, Richard Stockdale, Esq., Mayor of Bolton, and John Hick, Esq., of Bolton, Engineer, do hereby certify that every facility was offered by the patentee to all persons present to have the above-mentioned Safe tested in any way they might deem fit, and that such Safe was thereupon fairly tested in our presence, the result proving perfectly satisfactory. And we further hereby certify that, in our opinion, no burglar can open Chatwood's double patent 'gunpowder escapement,' 'hematite intersected' safe with the facilities and time that can be at his command: and also that the same, as we believe, is the best safe in the market, and we would strongly urge its adoption by all persons desiring immunity from the depredations of scientific burglars.

"14th February, 1865.

"RICHARD STOCKDALE, Mayor.
"JOHN HICK, C.E., Bolton"
