A Second Big Flow Struck Near the First One FIVE PAYING WELLS Fields Expected to Have Permanent Value—Oil is of Splendid Quality and a Good Illuminant—The Work Now Under Way.

Chatham, Jan. 10.—A little over two months ago Chatham was startled by the news that in Raleigh Township, eight miles south of the city, an oil gusher had been struck that gave the phenomenal flow of 1000 barrels a day.

After the first month much has been done toward the establishment of what is expected one day to be a permanent oil field, and the discovery of more oil during the rast week has started another stir. Four new paying wells have been struck since the Gurd Gusher. These, however, represent but a small amount of the work that is in progress. Early in November there was no sign of the present industry: to-day the farms in the neighborhood are

wells have been struck since the Gurd Gusher. These, however, represent but a small amount of the work that is in progress. Early in November there was no sign of the present industry; to-day the farms in the neighborhood are dotted with derricks and little neighboring sheds that cover boilers and engines.

Another Big Gusher.

The Gurd Gusher was the first strike, and its large yield keeps it to-day the biggest of the field. Yesterday afternoon, however, a good strike was made, which would be considered a wonderful find if it had not to compare with the Gusher. Coryell and Gage struck oil last week on Lot 22, Concession 13, the well was "shot" in the afternoon, and after the operation produced a flow that will yield 25 barrels an hour. This is but one half the capacity of the Gurd Gusher, but is greatly in advance of the other wells. A wen on Lot 23, Concession 12, produces 30 barrels a day, the well on Lot 18, Concession 18, is producing 20 barrels a day, and one on Lot 20, Concession 10, is produc-13, is producing 20 barrels a day, and one on Lot 20, Concession 10, is producing 20 barrels a day. Yesterday oil was struck on the Mills farm, a little In the evening an

Old story

The value of petroleum and products in 1901 was \$1,467,940, in 1900 was \$1,869,045; in 1899, \$1,747,352; and in 1898, \$1,970,534.

Above is the result of careful investigation upon the part of one of the leading Canadian newspapers, who during the week ending January 10th despatched one of their special reporters to examine the field. It comprises an extremely gratifying endorsement of the company's statements, and ctill lands out of the 1530 acres, surrounding their "Gurd Gusher."

A marked demonstration of the way in which the permanency of this field is regarded is shown by the Standard Oil Company having constructed a pipe line from the "Gurd Gusher" to the nearest railroad, and now erecting additional steel tankage and pumping stations.
