

THE WEATHER.

Maritime—Fresh westerly to north-erly winds, fair and cool. Toronto, Ont., Sept. 17.—Very warm weather has prevailed today in St. Lawrence Valley and Maritime Provinces, while elsewhere the weather has been fine.

New England Forecast. Washington, D. C., Sept. 17.—Fore-cast—Fair Saturday and Sunday; cooler in south and west portion Sat-urday; moderate to northwest winds, shifting to northeast.

Suffering from Pneumonia. Mr. John Murphy of McAdam was brought down on the Boston train last evening suffering from pneumo-nia. He was removed to the hospital in the ambulance. At an early hour this morning he was reported to be resting comfortably.

Police Reports. Between 6 and 7 o'clock last evening Policeman McNamee was called into Frank Hogan's house on Main street to quell a disturbance which the owner was making. Policeman Ward reports that the sidewalk on Forest street is in a bad condition, and should be attended to.

Mill at Cole's Island Closed. The mill owned by R. H. Coles at Cole's Island has been closed down permanently. The machinery which has been sold to Mr. Charles H. Evans of West St. John was brought down river on the steamer Sincennes yesterday.

Hand Cut Off. John Murphy, Jr., the sixteen year old son of Mr. John Murphy, a sum-mer resident of Murphy's Lake, near Revere Hill, Kings County, had his hand cut off last Wednesday by com-ing in contact with a threshing ma-chine. Dr. Jenkins was summoned and rendered surgical aid.

Scots Boy's Brigade. At a meeting last evening in St. Stephen's school room of the Scots Boy's Brigade, a programme for the military tournament, which the boys intend holding in the Queen's Rink on Oct. 5 was outlined. The tourna-ment will consist of military forms and tactics fancy drills, dances, foot races and other sports. It will be the first of its kind held in the city in eight years.

Escape From Chain Gang. James Boyd, who was serving a hard labor sentence on the charge of resisting the police and for drunk-ness, made good his escape from the chain gang yesterday afternoon. Boyd was trusted by the guards to go some distance from the rest of the gang to wheel in some rock in his barrow about three o'clock, but failed to return and when search for him was made, no trace was found. Boyd was arrested on August 26th by Police-man Crawford.

How the Jury Stood. The Standard learned on good au-thority last night that the jury in the MacDougal case did not arrive at a verdict on the count containing the libel on Magistrate Kay and the ob-scenity count until after considerable deliberation. On the counts on which they disagreed it is reported four voted for conviction and eight for ac-quitment. The first vote recorded on the counts containing the libels or Bullock and eleven for convic-tion and one for acquittal. The sec-ond vote was unanimous.

Sailing for Cuba Oct. 5. The St. John, Boston and Cuba Steamship Company have chartered the S. S. Karen, and the first sailing from St. John direct for Havana will be on October 5. The steamer will dock at the Ballast Wharf. The Karen is a first class steamer, built in 1905, of 2,600 tons dead weight, and will give a three weeks' service to the ship-pers. The steamer should make the trip to Havana in about seven days. For information regarding space, freight rates, etc., apply to F. E. Law at the Ballast Wharf, phone 179, or F. E. Williams Co., Ltd., Princess street, phone 521.

A Visitor from Boston. Mr. Frank Laskey, engineer in the Fire Department, South Boston, is spending a few days in the city. Speaking to a Standard reporter last evening Mr. Laskey said that the en-gines in use there were all of the Metropolitan type and much the same as the one at No. 3 station here. These engines differ from the ordi-nary type in that they have the bal-ance wheel located at the centre of the engine instead of at the side, which is considered a great advan-tage. Mr. Laskey stated that at the recent fire at the Cunard docks in Boston his engine worked for thirty-eight hours without a hitch.

Archaeological Society. Prof. H. L. Wilson was very suc-cessful yesterday in his efforts to re-secure members for the branch of the Archaeological Society that is to be formed in the city. About forty citi-zens have already decided to become active members. Prof. Wilson accom-panied by Prof. H. Judson Eaton left last evening for Halifax, where they will endeavor to start a branch in the sister city. He will return to St. John on Sept. 22 and will deliver a lecture on "Recent Discoveries in Rome." Prof. Wilson expressed himself as highly pleased at his success in St. John and at the interest shown in the movement.

Seven Wires Now to Montreal. An evidence of the increase of busi-ness in the city is the installation of an additional wire between St. John and Montreal by the Canadian Pacific Railway Telegraph Company. For some years the telegraphic service in-cluding press despatches and ordinary telegrams has been handled with six wires. Lately the need for a seventh wire has made itself felt and the com-pany had a new one strung. This was used for the first time last night and gave complete satisfaction. When the new winter port traffic opens, there is a considerable addition to the tele-graphic business and the C. P. R. will be in a better position to handle the despatches.

FACTORY INSPECTOR DENIES STATEMENTS IN SUN'S INTERVIEW

Were False Or Wrongly Quoted—What He Said Was Omit-ted—Well Received By Mill Owners.

Mr. John Kenney the recently ap-pointed factory inspector for New Brunswick, speaking with The Stan-ard, yesterday expressed regret at the publication in yesterday's Sun of what was alleged to be an interview with him on the conditions he had found existing in the factories about the city. The Sun's article, he said, was very misleading and would give the managers and owners of mills and factories a false impression about the methods employed by him in his work. "A young man came to the house last evening," said Mr. Kenney, "and stating that he was a reporter from the Sun, asked me if I had anything new. I replied that I had not, beyond the fact that I had started my duties as factory inspector on Monday. He asked me a number of questions about the work and without writing down a single word of my replies to him went away and put all those statements in my mouth that appeared in the paper. Most of the state-ments were either false or wrongly quoted and the remarks that I did make were left out. I was sorry when I saw the article in the paper the next day. He must have been hard up to fill space."

Has Been Well Received. Since assuming his new duties last Monday, Mr. Kenney said he had been courteously received by those in charge of every mill he had visited. The managers had done everything in their power to help him with his work and were in favor of the inspec-tion law. Not only were they willing and ready to make any changes he thought necessary, but they were an-xious for him to make any suggestions that would safeguard their workmen and promised to carry out any im-provements he thought necessary. Asked whether or not the law re-garding child labor was being viola-ted, Mr. Kenney replied that he had not yet had time to investigate exist-ing conditions and therefore could not speak with authority about the mat-ter. "I am doing my work as well as I know how," the new inspector con-cluded, "and I hope that incorrect re-ports in the newspapers will not give the employers of labor a wrong im-pression and interfere with the suc-cessful discharge of my duties."

TWO WOMEN NOW IN ALMSHOUSE TO JOIN FRIENDS IN STATES

Mrs. Phoebe Gallant Will Leave This Evening—Mr. Black-Burn Goes On Monday—Two Unusual Cases.

Two citizens of the United States, Mrs. Phoebe Gallant and Mrs. Rich-ard Blackburn, who have been the guests of the city of St. John at the Municipal Home for several weeks, will proceed to their respective homes within the next day or two. Mrs. Gallant is a native of P. E. I., but has lived twenty-four years with relatives in Brooklyn, N. Y. On her return from a visit to her old home in P. E. Island early in August, she was detained by the United States immigration officials and a \$500 bond was demanded as the condition of al-lowing her to enter her adopted coun-try. After investigation, however, the United States authorities receded from their position and Mrs. Gallant will leave on the Calvin Austin to-night. Mrs. Blackburn's home is in Thomastown, Me., and she left there in July with the intention of remaining with her daughter at Weymouth, N. S. She was given a cold reception, how-ever, and with her husband, started to walk back to Maine. She was ob-liged to give up the journey, however, and took refuge at the almshouse un-til her husband sent the money for her fare back to Thomastown. The money has arrived and she will leave on Monday morning.

SMART DETECTIVE WORK AT I.C.R. DEPOT BY NIGHT WATCHMAN

Patrick Gorman Recovers Suit Case Stolen From Lady Pas-senger—Thief Takes To His Heels.

Patrick Gorman, night watchman of the I. C. R. depot, accomplished a clever bit of detective work just prior to the departure of the Boston train last evening. A lady who intended go-ing by the train, stepped into the dining room for a few minutes, leaving her suit case outside the door. When she came out again she was surprised to find that the suit case had disap-peared. She immediately informed Mr. Gorman and told him that it was marked with the initials W. P. Stationing himself where he could watch all who boarded the train he noticed a young man about to step on board one of the suburban trains with the suit case in his hand. Mr. Gorman lost no time in con-fronting the stranger and told him to hand the suit case over. Seeing that the game was up, the man drop-

FIRST FRUITS OF SPORTSMEN'S GUNS REACH THE CITY

Two Fine Moose And Several Deer Arrived Yesterday—Big Game Very Plentiful—200 Resident Licenses.

The first big game to reach the city since the opening of the season was sent in from the country yesterday, and both deer and moose meat were on sale in the public market. A large moose with an antler spread of 51 inches was brought down by Ernest Goggin at Apohaqui and the carcass and head shipped to St. John by Messrs. Jones and Sinibaldi and Smith are mounting the head which is a good one, but presents a some-what peculiar appearance as the ant-lers are still covered with the "vel-vet." As far as is known, this was the first moose shot in New Brunsw-ick in the season of 1909. The meat sold in the market for 16 and 18 cents per pound. Several carcases of deer were also brought to the city yesterday. Wil-liam Rogers, of Barnesville, who was in town on Wednesday, secured his license and yesterday brought back his first deer. He reported the deer as plentiful, and says he could easily have bagged another, but preferred to wait a little longer, as he is only allowed to shoot the two in one ses-sion. Saw Eight Deer. Wm. Monahan who drives from Barnesville to the city quite fre-quently, reports seeing eight deer on one trip on Wednesday. He had no license that day but secured the nec-essary paper yesterday. A resident of Drury Cove also reports seeing four deer in one group in the vicinity of his home. From the big game districts where non-residents are hunting, there is no word as yet. Many of these par-ties will stay in the woods until Oc-tober 1st and sail down the heads that are taken. The number of non-resident licenses issued at St. John so far is not large, but those granted to residents has far exceeded previous records. In the three days of the season, more than two hundred have been granted and there is every prom-ise that the total revenue from game licenses this year will show a dec-ided increase. The Moncton train, which arrived here at 9:30 o'clock last evening brought another load of the forest to the city. This moose fell a victim to the rifle of Mr. M. Carleton, and was shot near Norton. He is a fine specimen of the New Brunswick herds having a beautiful head with a spread of about forty-five inches and sig-ned to Mr. D. J. Foohey of the city market.

DOG SHOW PROMISES TO BE BEST EVER HELD IN PROVINCES

Many Improvements Over Pre-vious Year—Ladies Pets a Feature—Superintendent Will Be In Charge.

There now seems to be little doubt that the second annual show of the New Brunswick Kennel Club to be held in Queen's Rink, Sept. 28, 29 and 30th, will be the largest and most successful affair of the kind ever held in the province. Many entries have already been received and it is understood outside dog-fanciers are well represented. The feature of the entry list so far, is said to be the number of ladies in society who are sending in their pets. The local competition will be in a better position this year, owing to their previous experience and there is a marked improvement partly due to the efforts of the Kennel Club in the class of open dogs in the city. The classes which will be particu-larly well filled include setters, spaniels, and Boston terriers. A large number of special prizes have been offered, particulars of which appear in the premium list which has been issued this week. Superintendent in Charge. A radical change in the system of conducting the show will be carried out, involving the appointment of a superintendent to devote his entire time to the task of looking after the animals on exhibition. He will have several assistants and will work with an efficient committee of the Club. Another new departure will be the Club's agreement to take entire charge of the feeding of the dogs. Arrangements have been completed with Spratt's Patent Ltd. of London, through their Montreal agents to supply all the food necessary and under the careful supervision of the super-intendent there will be no question but that the dogs will be well cared for. New kennels have been built in Queen's Rink and every precaution to ensure comfort and cleanliness. Generous prizes are being offered by the Club, and it is hoped the pub-lic will give the show the warm sup-port it deserves. Entries close on Monday next. Those wishing entry forms and premium lists can secure them by applying to any of the following: LeB. Wilson, 76 Germain street; F. Mc-Cullough, 207 Brussels street; J. Le-Lacheur, 44 Germain street; McKell's Bakery, Main street, Charles Conway, No. 2 Engine House; or R. Patterson, 89 Water street.

THE MAN WHO SHAVES

will find the greatest satisfac-tion in using CUTILAVE. It is ready for instant use, is poured from the bottle; is antiseptic and prevents infection from un-clean soap and razor; neutral-izes and removes impurities from the pores; is delightfully cooling, averts irritation, and heals all eruptions due to scrap-ing. The lady, needless to say, was glad to get back her property, and over-whelmed Mr. Gorman with thanks, causing the sturdy guardian of Gov-ernment property to blush like a schoolboy. The thief has not been seen since.

STYLISH FALL CLOTHING AT PRICES WITHIN REACH OF ALL. Buying a suit of clothes is not an every-day affair—a fact that makes the man of small income use considerable discretion and judgment. When buying a suit, you want one that not only wears well, but one that will FIT and LOOK well, for an indefinite period; a suit that you can depend on to keep its shape. Our clothing is guaranteed to do this because the materials are good, thoroughly sponged and shrunk and tailored by hand. You will readily see that you can save money by purchasing here inasmuch as the same suit, custom-made would cost much more and in most cases not as well made. Not only are the materials of the most favored patterns, but the workmanship is difficult to equal. Suits and Overcoats From \$10 to \$27 GILMOUR'S, 68 KING STREET TAILORING AND CLOTHING. "A Good Place to Buy Good Clothes." A 50 page booklet for the asking.
