

A Trench Dog

I heard a furious barking as I approached the farm, at the back of which runs a little-used right-of-way; the path, in fact, cuts through the unenclosed "house-grounds" of the farm, writes a correspondent. It was the familiar voice of Benny, the farm dog, that I heard. I have known him for years as a creature violent in manner, as becomes his office, but most benevolent in essential disposition. As I drew nearer I saw a soldier, with his back against a wood-stack, looking at him. Benny was trying to strangle himself with his chain.

"There's no harm in that dog," I said, as I came up.

"Shouldn't care if there was," said the soldier; "no dawg'd do me no mischief. But he set me thinkin'." He put down his stick, went up to Benny, and in a moment the dog had his fore-paws on the man's tunic and his tail was tapping against the side of the kennel. The soldier came back slowly, picked up his stick, and stared absent at the wood-stack.

"Set me thinkin'," he did," he repeated.

I offered him a cigarette, which he accepted, and then we both sat down on the bundle of fagots, with our backs against the stack.

"What did he set you thinking of?" I asked.

"Of over there," he said, "an' Gawd knows a chap don't want to be reminded of that."

"I should think not,"

"But I'm 'reoin' back," he said, "when this silly old hand o' mine gets limber again. I ain't done with the blighters yet. If 'twas only for little Whiskers' sake I'd have another go at 'em." He looked at Benny, who was now sitting at attention, with his ears cocked, watching us.

"Whiskers," the soldier proceeded, "was a dawg that took up with our company in a rest camp, an' in particular he took up with me. An' bein' fond o' dawgs, I took up with him. I reckon he came from a smashed-up village 'bout a mile away. We called him Whiskers along of his hairy face; all stuck round with a kind o' beard, it was. I don't know what breed of a dawg you'd call him; praps he didn't know hisself. Anyway he was a Frenchy, an' mighty obligin' an' perlie. He'd scold hard tack, or bully, or anythin' an' never made no complaints. Once I copped him burlin' a bone that he'd pinched, but he was that ashamed of hisself that he never tried it on again." The soldier took another cigarette, lit it with elaborate care, sighed deeply, and proceeded.

"He was a fair marvel to learn tricks, was Whiskers. Half the company was for learnin' him, but I said as how that'd only mix up his brains. An' I took him in hand meself. He'd dance on his hind legs, barkin' a sort o' tune to it, an' he'd stand on his head, an'—well, there was no end to his funniments. I made a little wooden rifle for him, an' he'd sit up, holdin' it tucked under his right arm. He fancied hisself at that game. An' I learned him to spit when shells came over. Never seen a dawg spit? Well, Whiskers did. He was a fair marvel."

"Did he go with you into the front trenches?"

"You may take your dyin' oath that Whiskers was allus along o' the company, an' allus alongside me. Didn't mind cold, nor wet, nor nothin'. I made him a little coat, but he didn't like it; I s'pose it tickled him, same as a noo flannel shirt did me afore I got used to the crawly ticklers."

"What did Whiskers do with his coat?"

"Pulled it all to bits one night, and showed me what he had done in the morning. Seemed proud of it, he did, same as he was of a noo trick. He was a mighty careless sort o' dawg, an' afraid o' nothin'. Used to get out o' the trench and wander around with the bullets pluggin' about. An' that was the end of him. One o' their snipers saw him a-walkin' along the top o' the parapet, an' done him in. A dirty trick, an' senseless, blast him!"

"A filthy trick," I said.

"We buried Whiskers under what was left of a tree, an' fired a salute over him. An' I stuck his little wooden rifle atop o' the grave, same as they stick crosses over other people. Next day I got bunged in the hand. But I'm goin' back. I haven't done with the swine yet."

He went over to Benny, patted his head, and returned to shake hands with me.

"Funny," he said, "how that dawg set me talkin' about old Whiskers. I allus was fond o' dawgs."

Indigo Industry in China.

The shortage of the supply of synthetic indigo in the markets of the world as a result of the war in Europe and the consequent high prices for imported indigo in Chinese markets has led to a revival of the native production of indigo in various parts of China. Indigo production is one of China's oldest industries. The Chinese developed their own process of making the dye and used their native product for many centuries before foreign dyes were known. The production of native indigo has continued ever since.

The fool theories a man gets in his head cause a lot of trouble when they explode.

DISEASES OF THE NERVES

Are Due to Poor Blood and Only Curable Through the Blood.

There is an excellent reason why Dr. Williams' Pink Pills have cured the most severe cases of neuralgia, sciatica and other complaints in the group known as disorders of the nerves. This group also included nervousness and excitability. Each of these complaints exists because the nerves are not getting a proper nourishment from the blood. The reason why Dr. Williams' Pink Pills cure nervous disorders is because they make the rich, red blood upon which the nerves depend for proper tone. It is thus seen that Dr. Williams' Pink Pills cure nervous disorders because they go to the root of the trouble in the blood, and while they are doing this they strengthen and fortify the whole system against disease. Among the many who have found relief from pain through this great medicine is Miss Ethel Smith, residing near Burford, Ont., who says: "Some years ago I was seized with a great pain in my right leg, between the hip and knee. It became so bad that I got no rest, day or night, and often cried with the pain. The doctor said the trouble was rheumatism of the sciatic nerve. Liniments were used until they actually took the skin off, and still the pain grew worse and worse. Then all the other nerves in the limb seemed to be affected, and it kept jerking and twitching until it would have to be held to keep it still. Then the doctor put the limb in a paper mache case, but it was not long until the trouble began in my other limb, and it had to be treated in the same way. I lay in that condition for three years with my whole nervous system so badly shattered that it would make me scream if any one walked across the floor. Then my throat became partially paralyzed and I could scarcely speak. During this time I had been attended by three different doctors, who did all in their power, but each said I would never be able to walk again. Then my father decided to get me Dr. Williams' Pink Pills. Before I had used them long I felt them helping me. This so encouraged us that the use of the pills was continued and in a few months I was able to walk half a mile each day to get the mail. I used, in all eighteen or twenty boxes of the Pills and they did what three years of doctoring had not been able to do. I am as well as ever I was in my life, and have had no return of the trouble. My family and friends think my cure was a miracle, and we give all the credit to Dr. Williams' Pink Pills."

You can get the pills through any medicine dealer or by mail, post paid, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

A DELICATE PROCESS.

How High Explosives Are Made From Cotton.

Almost all the high explosives have cotton as their base. It is true that very good sporting powder can be made from wood pulp, but, as the editor of Nature remarks, "the artillery would be in great difficulty if he were provided with such a propellant, because in order to obtain any sort of regularity the nitration of the wood pulp has to be kept at a low point, and the ballistics, on which the artillery depends, would be quite thrown out."

High explosives are cellulose highly nitrated—that is, highly charged with nitrogen. This process consists of immersing cotton waste (that has been repeatedly teased, picked and dried) in a mixture of nitric and sulphuric acids, in the proportion of 71 per cent. sulphuric acid, 21 per cent. nitric acid and 8 per cent. water. After the acids have acted for the required time they are removed; the cotton is washed repeatedly and boiled several times in water. It is then pulped, partly dried and pressed into molds.

The manufacturer does his best to regulate his output so that it shall contain approximately eleven molecules of nitrate to the quadruple molecule of cellulose, as shown in the formula, or a content of nitrogen that ranges between 12.93 and 13.05 per cent.

The process is delicate and complex, for the proportions of acids and water must be exact and all must be chemically pure; besides this the cellulose must be of uniform grade, which is a most difficult thing to obtain.

CHILDHOOD AILMENTS

Constipation and indigestion; colic; worms, colds and simple fevers, and all the other minor ills of little ones can be promptly cured by Baby's Own Tablets through their action in regulating the stomach and bowels. Concerning them Mrs. H. H. Mills, Haldimand, Que., writes: "I have found Baby's Own Tablets of great service in relieving my little one of constipation and stomach trouble." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

When some people talk it's a waste of time to yawn.

APPLE PLANTING.

Circular Issued by the Ontario Department of Agriculture.

With the return to favor of the apple which is again a high-priced fruit, planting will undoubtedly be resumed. One grower wants to set out about twenty acres in the central part of the Province. What varieties shall he plant?

Up to date the following have been recommended from which to select for the districts bordering Lakes Ontario, Erie, Huron, and the Georgian Bay, viz., Astrachan, Duchess Gravenstein, Wealthy, Alexander, McIntosh, Fameuse, Blenheim, King, Hubbardston, Greening, Cranberry, Baldwin, Spy and Stark. Of these varieties, the Astrachan is only of value close to large local markets, where it has paid well. Gravenstein should be of value for Ontario markets, but on account of the large quantities sent out by Nova Scotia at low prices to both the West and for export, it is also limited in value. This still leaves a choice selection for summer and fall use, varieties that can be shipped to local or western markets or exported with good results. Duchess have been in particularly good demand for the western trade, and Ontario has not been able to date to furnish even her home markets from orchards now in bearing. The same condition applies also to the three dessert varieties, Wealthy, Alexander, McIntosh, the two latter always selling at fancy figures. Alexander and its seedling, Wolf River, sell entirely on their outward appearance, showing large size and handsome color.

In winter varieties we are not so fortunate. The King is an ideal apple, but unprofitable, as the tree is a shy bearer. The old reliable Greening, one of the best bearers we have and a money-maker in the past, is becoming more difficult to sell in car lots in competition with red varieties. The tree is vigorous, hardy, and very productive. The old orchards still remain with us, and it is doubtful if they should continue to plant, knowing that every year will see more of this apple on our markets from the orchards set out in the past ten years. The Baldwin, our mainstay in the red fruit, is now being looked upon with disfavor in a great many sections because the tree is proving less hardy than we thought, even in the most favorable parts of the province. There remains of our list, then, Spy and Hubbardston among the quality apples, Cranberry and Stark among the good keepers and shippers. We need badly a variety combining all these qualities and will make the plea of the Baldwin for future plantings. The Hubbardston is good, but the season for its use is short. The spy is the apple that Ontario has built its reputation upon, and all plantings should include a goodly percentage of this variety. Its presence in the car is demanded for all local and western shipments in excess at least of twenty-five per cent., and in most cases the spy sells at other varieties. A straight car of Spies always has and always will command top prices on the market. Its one fault is the slowness in bearing, but this can be offset by the use of fillers such as Wagner, Wealthy, Duchess, etc. The very fact that an orchard contains a fair percentage of trees of this variety adds wonderfully to the value of a property.

Throw Away Your Eye-Glasses!

A Free Prescription

You Can Have Filled and Use at Home

Do you wear glasses? Are you a victim of eye-strain or other eye-weakness? If so, you will be glad to know that there is real hope for you. Many whose eyes were failing say they have had their eyes restored through the principle of this wonderful free prescription. One man says, after trying it: "I was almost blind; could not see to read at all. Now I can read everything without any glasses and my eyes do not water and are clear. At night they would pain dreadfully; now they feel like all the time. It was like a miracle to me." Another man says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything was clear. I can even read fine print without glasses." It is believed that thousands who wear glasses can now discard them in a reasonable time, and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. Eye troubles of many descriptions may be wonderfully relieved by following the simple rules. Here is the prescription: Go to any active drug store and get a bottle of Bon-Oro. Fill a two-ounce bottle with warm water, drop in one Bon-Oro tablet and allow to dissolve. With this liquid, bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly right from the start, and inflammation will quickly disappear. If your eyes are bothering you, even a little, take steps to save them now, before it is too late. Many hopelessly blind might have been saved if they had cared for their eyes in time. The Valmus Drug Co., of Toronto, will fill the above prescription by mail, if your druggist cannot.

Sounds of Nature.

The inhabitants of a frog close at hand awakened two little girls who were spending their first night in the country.

First came the high, piping voice of a little "peeper."

"What's that?" whispered Winnie. "I think it's a bird," ventured Susan.

Just then a basso profundo frog sung one of his lowest tones.

"What's that!" came another startled whisper.

"I ain't quite sure," came the answer, "but I think it is either a cow or an automobile."

A bachelor who reads the marriage notices isn't satisfied with his lot.

Dangerous Throat Troubles Prevented by Nerviline

IT ENDS MISERY OF COLDS QUICKLY.

Don't wait till night. Get after your cold now—this very minute, before it grows dangerous you should apply old-time "Nerviline."

Rub your chest and throat, rub them thoroughly with Nerviline. Relief will be immediate.

Nerviline will save you from lying awake to-night, coughing, choking and suffering from congestion in the chest and acute pain in the throat.

Nerviline will break up that dull neuralgic headache—will kill the cold and chill at its very beginning—will save you from perhaps a serious illness.

To take away hoarseness, to break up a grippy cold, to cure a sore throat or bad cold in the chest, you can use nothing so speedy and effective as Nerviline. For forty years it has been the most largely used family remedy in the Dominion. Time has proved its merit, so can you by keeping handy on the shelf the large 50c. family size, or the small size 25c., sold by any dealer anywhere.

FROM ENGLAND TO FRANCE.

No Gun Yet Invented That Will Fire a Shell That Distance.

"Queen Elizabeth's Pocket Pistol," a big weapon for its time, bore the legend.

"Feed me well and keep me clean, I'll send a ball to Calais Green."

This statement was rather an exaggeration, says Tit-Bits, for no gun has yet been invented that will fire a shell from England to France.

No matter how well it were fed or how clean it were kept, the old-fashioned cannon would not have sent a ball more than a tenth of the way to Calais, despite the fact that it stood three hundred feet high upon the cliffs of Dover, and was twenty feet long.

Even one of the famous seventeen-inch siege guns of the Germans would be unable to accomplish the feat. A military expert says that for a shell to reach England from France, it would have to be thrown twelve miles into the air. Although the famous German seventeen-inch weapons could send a shell over Mont Blanc, they could not hope to hurl a "Jack Johnson" more than three-quarters of the way from Calais to Dover.

Corns Cured Quick

Applied in 5 Seconds. Sore, blistering from corn-punctured toes can be cured by Putnam's Extract in 24 hours. "Putnam's" soothes away that drawing pain, eases instantly the feet feel good at once. Get a 25c. bottle of "Putnam's" today.

How the Germans Get Gold.

Giving his impressions of a sojourn in Berlin, M. Maurice Shrauss says the streets are no longer safe at night-time, and crimes and outrages are on the increase. M. Strauss was assured that in making arrests the order was given to single out people who seem to be in easy circumstances. At the police station these people are searched, and if gold is found in their possession they are reprimanded for their lack of patriotism, and are told that if they agree to exchange their gold for bank notes or War Loan scrip they will be released, and nothing more will be heard of the charge on which they were arrested.

DR. JACKSON'S ROMAN MEAL IS A FOOD, NOT A PRAISE.

Many so-called cereal foods are frauds. To prove it, try to live entirely upon Roman Meal for a few days. Many live entirely upon Roman Meal. A recent letter from California says: "Dear Dr. Jackson: A friend of mine lived upon Roman Meal for thirteen months. His case had been pronounced hopeless. He is now in perfect health." No fraud here. Roman Meal is scientifically balanced by its nutritive value, and is the perfect food, and positively relieves constipation. Ask your doctor. Make it in porridge, pancakes, gems. At grocers', 10 and 25 cents.

Next-Door Neighbors.

For six years a bitter feud existed between the Browns and Robinsons, next-door neighbors. The trouble had originated through the depredations of Brown's cat, and had grown so fixed an affair that neither party ever dreamt of "making up." One day, however, Brown sent his servant with a peace-making note for Mr. Robinson, which read—"Mr. Brown sends his compliments to Mr. Robinson, and begs to state that the old cat died this morning." Mr. Robinson's reply was bitter. "Mr. Robinson is sorry to hear of Mr. Brown's trouble, but he had not heard that Mrs. Brown was ill."

Murine. Murine is prepared by our Physicians, as used for many years in their practice, now dedicated to the Public and sold by Your Druggist. Try Murine to Relieve Cold Cutting Winds and Dust and to restore healthy vision. Murine is made from Overwork and Eye Strain.

Some broadminded Physicians use and recommend Murine while others perhaps jealous of its Success, talk and rush into print in opposition; those who have used Murine can give you the answer. There is no Prescription fee in Murine. Just hand your Druggist and receive a Complete Free Eye Book—Murine—Druggist—and Cork Screw—ready for use. Try it in your Eyes and in Baby's Eyes for Red, Itchy, Watery, and Smarting Eyes. Comfort. Write for Book of the Eye Free. Murine Eye Remedy Company, Chicago.

RAW FURS

We pay highest net cash prices. It's not what the price list promises, but the money you actually get that makes your profit. We have built up a large list of shippers through trading them fairly. We are especially known for the quality of our furs. We charge no commission. We pay all express charges. Write for our price list and special offer.

Ginseng and We are the Golden Seal get buyers of Ginseng and can therefore pay highest prices. Write for price list.

DAVID BLUSTEIN & BRO. Fur Dealers and Exporters. 163 W. 27th St., New York, N.Y.

Candle Puts Itself Out. It has been found that candles can be fitted with attachments to extinguish the light at a set time. To determine the length of time it is necessary to mark a candle of the size and time how long a certain length of it will burn. Then it is sufficient to suspend a small metal dome or cap, to which a string is attached, directly over the flame, and run the opposite end of the string over nails or through screw eyes, so that it can be tied around the candle such a distance from the flame end that the part between the flame and the string will be consumed in the time desired for the light to burn. When this point is reached the string slips off the candle and the cap drops on the flame.

Prohibition Favors Tea-Drinking. Well-informed members of the tea trade say that the figures for the year show an astonishingly large increase of tea drinking throughout the world. Prohibition is largely to account for this, and when a great country like Russia prohibits the sale of strong drink and the people turn to tea, it means an immense drain on the resources of the gardens whence comes the world's supply. In the last few months the cost of tea has risen 12 or 14 cents a pound.

Better Unpublished. "Would you like some views of the hotel to send to your friends?" "Sir," said the disgruntled guest, "I presume it will be better for me to keep my views to myself."

Minard's Liniment Cures Distemper.

It Will Be Different. "Young man," inquired her father sternly, "will you give her a home like the one she has been used to?" "No," replied the truthful suitor, "for there will be no grumpy father to come home and make everyone miserable by kicking over trifles and swearing at matters in general. There will be no mother to scold her from morning till night for wasting time. There will be no big brother to abuse her for not doing half of his work, and no little brother to make enough noise to drive her crazy when her head aches. There won't be any younger sister to insist on reading some trashy novel while she does all the work. She will not have with me a home like she has been used to, not if I can help it!"

Plain Talk.

British Tommy (somewhere in France) Speak English, Moussoo? French Shopkeeper—But—yes—a teetle, M'sieu.

British Tommy—Righto, then give us ten pounds o' spuds, an' arnce o' baccy, a packet o' fags, and a box o' lights, an' be slippy!

Minard's Liniment Cures Garget in Cows

Military Wedding Cakes.

The very latest war fashion is the military wedding cake. So largely has this become a feature of weddings associated with British military and naval men that the wholesale manufacturers are specializing in toy ornaments of a warlike character to decorate the cakes. These are mostly ornamental cannons, guns and rifles, with battleships for naval men, and very well executed models of aeroplanes for bridegrooms connected with the Flying Corps.

Minard's Liniment Co., Limited.

Gentlemen,—Last winter I received great benefit from the use of MINARD'S LINIMENT in a severe attack of LaGrippe, and I have frequently proved it to be very effective in cases of inflammation.

Yours, W. A. HUTCHINSON.

Sending Power Under the Sea.

The first instance in Europe of the use of a submarine cable for the transmission of high voltage electric power current will be in connection with the project for supplying practically all of Denmark with cheap electricity for both light and power, generated by water power in Sweden. When completed power sufficient to provide for an area of 500 square miles will be brought across three high-pressure cables laid under "the sound" at the entrance of the Baltic Sea. The electricity is to be generated with power from the Swedish River Lagan supplemented with the use of low-grade coal.

No Swindle.

You remember selling me some hair-restorer when I called the other day to get shaved, you hoary-headed old thief!" roared the indignant customer. "You sold it under false pretenses, sir. You said it would restore my head to its original condition."

"Well, didn't it work?" asked the barber.

Work? No. It's taken off that little hair I used to have, and I am as bald as the pavement now."

"That's quite right, sir. No false pretense about that. I said it would restore your head to its original condition, and you know, sir, most of us are born bald."

How Sickly Women May Get Health

If they could only be made to see that half their ills are caused by impure blood, it wouldn't take long to cure them with Dr. Hamilton's Pills. Truly a wonderful medicine that invigorates, strengthens, renews. Every tired, worn-out woman that tries Dr. Hamilton's Pills will improve rapidly, will have better color, increased appetite and better digestion.

No better rebuilding tonic can be found than Dr. Hamilton's Pills which are safe, mild and health giving. For forty years Dr. Hamilton's Pills have been America's most valued family medicine, 25c. per box at all dealers.

Knew What He Meant.

Lawyer (to witness)—Did you say that an incompetent man could keep a hotel just as well as anybody? Witness—No; I said an inexperienced man could.

Minard's Liniment Cures Colds, Etc.

Keep Food for Army Hot.

One difficulty of the Italian commissariat is to get food from the valleys to the camps in the mountains. The difficulty has, however, been solved and twice a day hot food is carried on the backs of mules in "cooking cases" designed by an Italian. The food is contained in a huge pan of aluminum with a circular opening, which can be closed hermetically by screws. The pan is enclosed in a case lined with cotton and cork and the food keeps hot for more than ten hours.

GREAT CHEMIST PRAISES ZAM-BUK

Mothers Who Use This Famous Balm Have Backing of Science

Mothers who use Zam-Buk, because they have proved it to be a splendid healer, will be interested to hear the result of a test of Zam-Buk by Mr. W. Lascelles Scott, the great English chemist. He says:—"I have made an exhaustive analytical examination of Zam-Buk and find its active constituents are of exclusive vegetable origin. It contains none of the impure and irritating mineral drugs and animal fats present in ordinary ointments. The antiseptic and bactericidal (germ-destroying) powers of this preparation have been proved by my tests to exceed those of carbolic acid, yet Zam-Buk neither cauterizes nor inflames even a very sensitive skin, but ends skin disorders."

"I have no hesitation in certifying the purity of Zam-Buk and its value for skin injuries and disorders."

Mothers who have not yet tried Zam-Buk should profit by the above. Zam-Buk is unequalled for eczema, cuts, burns, ulcers, running sores, piles, cold sores, abscesses, chapped hands, etc. All druggists and stores sell Zam-Buk at 50c. box, 2 boxes \$1.25.
