

Our Dispensing Department is under the direct supervision of the proprietor or a competent graduate of pharmacy, and every prescription written by your doctor should be brought to us. We keep the most complete stock of Pure Drugs and Chemicals and can always fill prescriptions on short notice.

Family Medicines Prepared from your own recipes receive special attention with us. We either mix them for our customers or supply the ingredients alone. Recognizing the importance attached to the use of Pure Drugs and Chemicals in making up medicine for the sick, we exercise the greatest carefulness in purchasing same, and none but the best manufacturers' goods are kept in stock.

Dinna Forget Skin Food *For beautifying and softening the skin, preventing tan, freckles or blackheads,* use as follows: Before retiring wash the skin with warm water and good soap, then placing a little of the cream on the finger tips rub in gently until absorbed. *To prevent wrinkles,* use as directed above but massage the face for five minutes with the cream: it feeds the tissues and plumpens the cheeks. *For chapped hands,* one thorough application will cure. *For redness,* use as directed above. This cream is positively guaranteed to not cause growth of hair, and a constant use of it three times a week will insure a good complexion, providing rules of health are observed.

KEEP THE TOP OF JAR SCREWED ON TIGHT
