

TRIUMPHANT.

First Prize at the Centennial Extra Prize at Western Fair.

ANDERSON'S Straw Cutter, Bread Knife, and Hay Knife

In the Straw Cutter, cheapness of construction, minimum of power and rapidity of execution have been attained.

With the Hay Knife, less power is required, and one stroke will do the work of three knives constructed on the ordinary principle.

The Bread Knife is a startling innovation on the habits of our forefathers. Thin as a wafer—cuts hot bread as well as cold, and no crumbs. Indispensable to every household.

We are daily shipping orders to New Zealand, Australia and the U. S. A large reduction for cash and large order.

Wilson, Lockman & Co.

MANUFACTURERS,

HAMILTON, - ONT.,

CANADA.

CUT No. 1

Represents Plain Family Machine, with solid shuttle and adjustable feed. The stand has solid walnut table with drawer, brace, balance wheel guard, and well, working on hinges, in which the Machine is set—this well protects the clothes of the operator, and enables her to clean and oil the machine without changing her position, all of which makes it the most complete, simple, attractive and durable Family Machine in the market at the present time.

CUT No. 2

Represents Half Cabinet Case Family Machine with walnut cover, lock and hinges: in every other respects like No. 1.

CUT No. 3

Represents full Cabinet Case, solid walnut, machine inlaid with pearl, making a very handsome as well as a useful piece of furniture.

CUT No. 4

Represents our Hand Shuttle Machine; it is set into a beautiful light iron frame, the feet of which are covered with rubber, thereby preventing it from damaging any piece of furniture upon which it may be placed; it also prevents garments from coming in contact with the oily parts of the machine during the operation of sewing, and yet leaves every part of the machine easy of access which requires cleaning and oiling, making it complete and practical.

CUT No. 5

Represents the Wilson Single Thread Machine. We, as manufacturers, having had unprecedented success with our Family and Manufacturing Sewing Machine, and having extensive experience of the wants of every market in the world, have decided to introduce a Single Thread Sewing Machine with capacity sufficient for any kind of work that a First-Class Family Machine is able to perform. We will not hazard our already established character and reputation as manufacturers of first-class machines, but will make our Single Thread Machine another exponent of the character and confidence we now possess.

CUT No. 6

Represents our Heavy Manufacturing Machine, suitable for either cloth or leather. The Cloth Machine has a plain pressure-foot. The Leather Machine has a rolling pressure-foot. The difference in the feet adapts them, in a particular manner, for the performance of either cloth or leather work in the most efficient and durable manner. Its mechanical structure and workmanship is surpassed by none and equalled by few. It is also japanned and ornamented in first-class style. Tailors and shoemakers, also manufacturers of clothing and boots and shoes, would do well to examine and test our machine before purchasing any other. We are confident that a thorough test will satisfy all who are capable of judging that our machine is the best and cheapest in the market.

OUR LATEST
