

## THE ENTRANCE.

PATENTED.

Remember that every School using this apparatus will show up well in Geography at the coming examination. Mathematical Geography is becoming a prominent feature of Geography Papers.

Remember that a half-hour's talk with the HELIOTERRA in hand will leave a deeper impression on the mind of the pupils than a score of lessons without it.

Within the last three weeks the HELIOTERRA has been

Is your name in the above list? Remember, these orders have come to us since January 1st, 1897. JOHN K. BROWN, *Prin. Model School, Napanee*, says: "Enter us for a *Helioterra* before the price is raised. I valued our *Madoc* one very highly."

JAMES McROBIN, *Alexandria, Ont.*, says: "Used instrument last year in another school, and feel lost without it here. My trustees have asked me to send for the apparatus. Would rather pay the price from my own pocket than be without it."

E. W. BRUCE, B. A., *Principal* and fourteen Assistant Teachers of Huron St. School, Toronto, says: "Have used the *Helioterra* a month. For teaching the cause of day and night, the seasons, equinoxes, solstices, long and short days, eclipses, moon's phases, etc., we know of nothing equal to the *Helioterra*. Apparatus was found useful in every department of the school."

Scores of other testimonials could be given had we space. If more are wanted, send for our descrip-tive circular.
