"A few years since a great manufacturer of Broma soat at the opinions of many medical gentlemen of distriction, for the purpose of having an unobjectionable for the invalids, and was assured that he lead fully succeeded in 10 contals, indicancies, and invisedods generally, sound always be provided with it. It is believed that those who use it as a beverage will have manifest diatetic advances over the measurers of the and offer. We see it stated that during the last summer those individuals who were continually using Chocolate or Broma neither had attacks of chotern or dysenteric affections, while others of the same families, taking their daily potations in tea. eyfer, or simple cold water, were the sufferers, if any. we cannot vouch for the truth of this, but it has recall-We cannot vouch for the truth of this, but it has recalled to mind the statement that the oil dealers in London have been free from Cholera or the choleroid symptoms. Auffit has been further observed that persons who were taking cod liver oil for chronic difficulties, during the prevalence of the late epidemic, were not affected by it. Vegstable oil in the first instance, and animal oil in the last, taken internally, would appear, by these statements, to have secured those who took them from the shafts of the pestilence. It is certainly a point well worth whilsto determine, whether the checolate drinkers have been secure in other infected cities."

Mott's Broma has now been before the public for a considerable period, and along with the commendations of the Medical Falculty of this and the neighbouring Provinces, it has received the approbation of all classes of consumers.—It is held to be an article of standard reputaconsumers.—It is field to be an article of standard reputa-tion, and the demand for it is constantly increasing. 17-83/4 Wholesale for the Proprietor, at Halifax, at MOR-TON'S MEDICAL WAREHOUSE, near the Province

Lumbago,
Ladies of pale complexion and consumptive habits, and such as are debilitated by those obstructions which formales are liable to, are restored, by the use of a bottle or two, to bloom and vigour.

The number of Diseases mentioned above, as cured by this preparation of Sarsaparula, may seem large; but we are, nevertheless, prepared to prove, by an extensive array of certificates, that such is the fact. A fraction of the evidence which we possess concerning each disease, would be received before any judicial tribunal as complete demonstration. It must be remembered that all this frightful array of maladies, though appearing in an endless variety of forms, are yet similar in their origin and causes: for they all spring directly or indirectly from a corrupt fountain. If the blood were in a pure, healthy, and active state, it would drive all these complaints from the system, and chronic disease would be impossible.
