## THE WEEKLY ONTARIO, THURSDAY, JUNE 14, 1917.

## Demands Universal Thrift and Economy in National Life.

2

Individual thrift and individual sacrifice will win the war. The upheaval in Russia and the extent of the latest German submarine campaign have increased the necessity for concerted national efforts by the rest of the Allies against the Central Powers. The obligation upon every man and woman in the Dominion to exercise their full powers for the successful prosecution of the war is not releived by the entry of the United States into the struggle. Canada must have more men for the fir-

ing line and it must have more money to support its military effort. The amount which the Dominion is expected to raise in the present year is estimated on good authority at \$600,000,000. Every dollar that the country can spare is needed to sup- Dr.

port the war burden. National thrift is essential to meet financial

struggle that lies ahead. There is a direct war work for everyone to do. Practise thrift and invest your savings in Government War Savings Certificates.
