

USE

"Corona" Dry Arsenate of Lead

for
Spraying Orchards and Potato Plants.

"CORONA" dry is not an experiment, it has been used by many of our leading farmers for years.

One pound of "CORONA" will do the work of from two to three pounds of Arsenate Paste, and be more effective because:—

It is a perfect, dry, fine white powder, and does not contain 50 per cent water.

It is pure and contains nothing but Lead Oxide and Arsenate Oxide, the only two chemicals essential of an Arsenate of Lead. It gives an even application, covers more thoroughly, and sticks to foliage longer.

It mixes easily and readily in water, no working up to prepare for the spray tank. No straining. It is only necessary to shake the proportional amount into the spray tank.

By using the same weight each time you spray, your mixture is always the same strength.

No sediment, no lumps, no water, never clogs spray nozzles.

He was en route to Kentville to visit his son, Prof. Saxby Blair, and before returning will also visit friends in Bridgetown. On the 25th this fine old Canadian soldier, if spared, will reach the 80th year of his age. Barring a slight lameness, the result of an accident a few years ago, he is still hale and hearty, young appearing and straight as an arrow. We were pleased to learn from him that his good wife was also enjoying excellent health. May they both long be spared to their relatives and their friends.—Truro Citizen.
