FISH, FOREST AND GAME

Association Formed by Prominent New Brunswickers at Fredericton Last Week.

MEMBERSHIP FEE \$2.00.

Organization Will Undertake Prosecution of Violators of Fish and Game Laws.

The New Brunswick Fish, Forest and Game Association was formed at Fredericton on Wednesday evening, 12th inst. Fred H. Edgerton presided at the chair. Among others present were: Surveyor General Sweeney; Deputy Surveyor General Hocking; Chief Warden Robinson; Notary Mauder; Geo. McKay, Newcastle; Thos. F. Allen, Steward of the Tobique Salmon Club; W. H. Allen, Pennac; and a large number of Frederictonians.

Letters of hearty endorsement were read from Ernest Hutchinson, Douglastown; W. B. Snowball, Robb's Lodge; and James Beveridge, Chatham; and James Campbell, O. Turgeon, M. P., Bathurst; the N. B. Forestry Association; T. Lynch, Fredericton; John T. Rundle, Boiestown; and others.

Several prominent lumbermen of the North Shore, while approving of the object of the association, expressed the hope that it would also give attention to the question of forestry protection and the meeting unanimously agreed to conform to their wishes in this respect.

An interesting letter was read from A. Kelly Evans, secretary of the Ontario Fish and Game Protective Association, telling of the good work which had been accomplished in that province.

Acting Secretary Winslow submitted a draft of the by-laws prepared for the association, and which were taken up section by section and adopted with some amendments.

Membership for the parent association was fixed at \$2 and provision was made for the formation of branches in counties, cities, towns and villages, they to pay a per capita fee of 50 cents. The fee for life members was fixed at \$25. Clergymen and teachers will be permitted to join free of charge.

The object of the association is the protection of game and fish, protection of forests from fire and to carry on an educational campaign. Power was given the executive to expel members for cause, but they can be restored on two-third vote of the general meeting.

The annual meeting was fixed for first Wednesday in May. Every branch organization formed hereafter shall be allowed to nominate members of the executive. The organization will undertake the prosecution of violators of the game and fishery laws and a legal committee is to be appointed by the executive for the purpose.

The following officers were elected: Hon. pres., Surveyor General Sweeney; pres., C. Fred Chestnut, Fredericton; first vice-pres., F. B. Edgcombe, Fredericton; second vice-pres., J. S. Neill, Fredericton; third vice-pres., Timothy Lynch, Fredericton; secretary, J. J. Winslow, Fredericton. The following additional vice-presidents were elected and power was given the executive to add to the number; Westmorland, J. W. V. Smith; St. John, George W. Jones; Carleton, Dr. H. A. Green; Northumberland, W. B. Snowball; Restigouche, D. Richards; Charlotte, Colf Chippman; Victoria, F. F. Allen; Kent, J. D. Irving.

T. F. Allen said he represented the Tobique Salmon Club and he assured the meeting that every member of that organization would join the association.

It was unanimously agreed that Fredericton should be the headquarters of the movement.

Surveyor General Sweeney, in a brief speech, expressed his cordial approval of the object of the association and assured the members that he would be pleased to cooperate with them in protecting the fish, game and forests of the province. He praised the work of the tourist associations in making the attractions of the province known to outsiders and expressed the hope that before long there would be branches of the new organization in every town and county of the province.

The secretary was ordered to have by-laws published for general information. All of the gentlemen present were enrolled as members.

PAIN

Pain in the head—anywhere, has its cause in congested blood pressure—nothing else usually. At least, so says Dr. Shoop, and it is true. He has created a little pink tablet. That little tablet—Dr. Shoop's Headache Tablets—courses blood pressure away from pain centers. It is a cleansing, pleasantly delightful, gentle, though safely, it surely equalizes the blood circulation.

If you have a headache, it's blood pressure. If you have a headache with a woman, same cause. If you are sleepless, nervous, it's blood congestion—blood pressure. That remedy is a compound of Dr. Shoop's Headache Tablets stop it in 20 minutes, and the tablets simply distribute the congested blood pressure.

Before your fever, and doesn't get red, and swell, and pain your forehead, it's congestion, blood pressure. You'll find it where pain is. Buy Dr. Shoop's Headache Tablets. Get all at 25 cents, and don't forget to recommend.

Dr. Shoop's Headache Tablets
Laxative 5¢ Sweet to Eat.

BRITAIN'S LAND TRANSFER LEGISLATION.

Some time ago the British parliament passed a bill providing for compulsory purchase at government valuation of large estates in Ireland and their division among the tenants. The latter are aided by the government and receive a full title to the land.

The Small Landholders Bill for Scotland is now before the House of Commons. It would create a kind of dual ownership, with fair rents fixed by government authority and fixity of tenure guaranteed from the same source.

Now it is the turn of South Britain. The following, according to the London Daily Chronicle, are the proposals of the Small Holdings Bill for England and Wales, which was introduced on behalf of the government into the House of Commons on the 27th ultimo by Mr. Lewis Harcourt, First Commissioner of Works:—

To set up, instead of a class of small owners, a class of occupying, cultivating tenants, directly under public authority and with the security of tenure given by public instead of private contract. The occupiers will have no saleable tenant right. Borough and County Councils will be the acting authority in the case of small holdings, and parish councils with regard to allotments (lots containing from one to five acres). These bodies will have power to obtain land by purchase or lease, by agreement or compulsion, with no addition to price on acquisition by compulsion. A Board of Commissioners, under the Board of Agriculture, will take action in the event of default by the local authorities. Co-operative societies and credit banks for the furtherance of small holdings may be protected and assisted by the Commissioners or the local authorities. There will be a Treasury contribution of £100,000 to the Small Holdings Fund of the Board of Agriculture in the first year.

If this bill becomes law, the municipal councils and, when they refuse or neglect to act, the national government will become landlords on a large scale. This is a startling innovation for conservative England, and the progress of the bill will be watched with interest in all other countries. The Lords may treat this new measure as they recently treated the Education Bill; but, unless all signs fail, the day of the irresponsible domination of the privileged classes is about over. The common people of England are beginning to assert their rights, and when once they are fully awake to their own interests the country will no longer have any use for the peers.

In Ireland the farmers are driving the cattle off the grazing lands with the purpose of compelling the owners of the latter to abandon grazing and sell their properties in small lots to actual cultivators. When every tenant farmer in Ireland becomes a landowner, there will still remain the propertyless people of the towns to be provided for. The government has already taken them into consideration, appropriation having been voted some time ago for the building of some 30,000 model cottages to be sold to laborers on easy terms. No such provision has yet been made for English, Scotch or Welsh laborers; but the government, having gone so far, cannot now draw back, and must ultimately use all alike. Once the stronghold of conservatism, the British parliament is rapidly setting a pace for other countries in radical democracy.

AUSTRIA AND BAVARIA.

The returns for last month's general elections in Austria are to hand for all the provinces but Galicia and Dalmatia. They show that the population of about 18,500,000 cast 3,230,509 votes. The Socialists elected 84 members, and secured 965,395 votes or 29.7 per cent. of the total vote polled. The Christian Democrats, the next largest party, elected 21 members. The vote of Galicia, which has 7,250,000 people, and of Dalmatia, whose population is 500,000, is not yet reported.

Bavaria (a German State with about 6,000,000 people) has, like Austria, lately adopted direct and equal manhood suffrage, and her first election under the new conditions was held a few days ago. The returns for 115 of the electoral districts show that, so far, the Liberal party has elected more than all the others put together, the figures standing: Clericals, 66; Socialists, 21; Liberals, 19; and the Peasants' League, 9. About 48 more districts are to be heard from.

BOIESTOWN.

Boiestown, June 8.—The river drives passed this place last week. Work on the new railroad bridge was stopped on Thursday by a heavy rain storm.

The Rev. Mr. Weaver is expected to arrive Saturday night and hold service Sunday afternoon in the Baptist church at three o'clock. A special choir is to provide music for the Forrester's Annual meeting which will be held in the hall the third Sunday of this month. Service to begin at seven o'clock.

Mr. Benjamin Dennison was badly hurt on Friday morning while working on the river. He will be laid up for some time.

DOCTORS USING PATENT MEDICINES

The Honest Physician is Anxious to Cure and Uses the Best Available Remedies.

The proposed legislation through the Dominion Parliament for the regulation of the manufacture and sale of patent or proprietary medicines is of the utmost importance, and it is receiving a great deal of attention, not only by the proprietary medicine manufacturers, but also by the leading doctors and druggists. Every manufacturer of reliable and high class remedies welcomes the bill as a step in the right direction. The discussion has brought out the fact that the best physicians in Canada and on the continent approve of and prescribe Psychine in cases of the most difficult character. In a recent instance of very serious throat and lung trouble the patient had been using Psychine. Two leading United States specialists were consulted in addition to two eminent Canadian physicians. Upon learning what the patient was using, a sample of Psychine was taken and analyzed, with the result that the physicians advised its continued use. They prescribed no other medicine but Psychine, with the result that the patient has fully recovered and is a splendid walking and talking advertisement for the wonderful curative power of a remedy that will "stand up" before the keenest professional criticism and analysis. As a builder up of the system and restorer of all wasted conditions, Psychine has no equal, and the best and most earnest physicians recognize this fact.

"At the age of 21 my lungs were in a terrible state. I had a grippe the year before; it settled on my lungs and I had a chronic cough which had done me low. I was in bed for six weeks. I had a consultation of doctors, and they said they could do nothing more for me. Then I started to use Psychine. I took the medicine for more than a year. It gradually did wonders for me. I am now as strong as I was before my sickness."
—Mrs. B. BOYD, Morpeth, Ont.

Psychine, pronounced Si-keen, is the greatest of tonics, building up the system, increasing the appetite, purifying the blood, aids digestion, and acts directly upon the throat and lungs, giving tone and vigor to the entire system. At all druggists, 50c. and \$1.00. Dr. T. A. Sloan, Limited, 179 King Street West, Toronto.

PLAIN SPEAKING.

Professor Magill's declaration in the Presbyterian General Assembly that "It is no use preaching to men, women and children who have nothing to eat and who are living in a room where no dog should sleep," was straight to the point and worthy of the most earnest consideration. That there are many such people in industrial centres and that their number is increasing more rapidly than the general population cannot be denied. If the churches are to hold the masses, they must display as

OPERATIONS AVOIDED

Two Grateful Letters from Women Who Avoided Serious Operations—Many Women Suffering from Like Conditions Will Be Interested.

When a physician tells a woman suffering from female trouble, that an operation is necessary, it is, of course, a frightful prospect. The very thought of the operating table and the knife strikes terror to the heart. As one woman expressed it when told by her physician that she must undergo an operation she felt that her death knell had sounded.

Our hospitals are full of women who are there for just such operations. It is quite true that these troubles may reach a stage where an operation is the only resource, but such cases are much fewer than is generally supposed, because a great many women have been cured by Lydia E. Pinkham's Vegetable Compound after the doctors had said an operation must be performed. In fact, up to the point where the knife must be used to secure instant relief, this medicine is certain to help.

The strongest and most grateful statements possible to make come from women who, by taking Lydia E. Pinkham's Vegetable Compound, have escaped serious operations.

Mrs. Robert Glenn of 434 Marie St., Ottawa, Ont., writes:—

Dear Mrs. Pinkham:—

Lydia E. Pinkham's Vegetable Compound is so well and widely known that I do not need my recommendation, but I am pleased to add it to the many which you have in your favor. I have suffered untold agonies from a serious female trouble for nearly three years, and the doctors told me that I must undergo an operation, but as I was unwilling to do this, I tried your Vegetable Compound, and I am only too glad to say that I am now well.

Ask Mrs. Pinkham's Advice—A Woman Who Understands Women's Ills.
