CHICAGO, May 5.—Meagre details have been received by the Atchison, Topeka and Santa Fe Railroad officials of a horrible wreck at Medill, Mo. The Chicago limited express, direct from the coast and San Francisco, was thrown from a bridge near that point at 8 o'clock this morning. So far as known all the cars of the manylificent. as known all the cars of the magnificent train, loaded as they were with transcontinental passengers castward bound, were buried in the waters of a flooded ravine. It is already known that many were crushed and drowned and more injured. The best information so far obtained is that seven persons were killed outright and 23 injured. None of the names of the killed or injured have yet been obtained. Medill is a small town about 25 miles beyond the Mississippi. Within a few miles of the place is a deep ravine, usually dry. It is spanned by a 50-foot arch, which it is supposed the heavy rains weakened and finally displaced. The wrecked train was due in this city this evening. Being an overland and limited train it is usually well filled with the best class of passengers. All the Santa Fe wires are down. The engineer and firemen were among the killed. as known all the cars of the magnificent
