The death is announced in England of the well-known stallion, Sir John, a son of Hermit and Thrift, who was foaled in 1878 and sent to France in 1884, although he returned to this country some years later. It appears that he met with an accident in his stable through the fall of a beam, which smashed his skull and caused his immediate death. He was said to be worth £22,000 and in France £2375. At the age he was not very prolific as a sire, but the best of his stock will be remembered as Le Nord, Le Nic, Ham, Haute Saine, Slyx, La Nivette, etc.

TAKE NO CHANCES.

Your Baby's Life Is Too Precious

Use Pure Lactated Food.

It is far easier to prevent disease than it is to cure.

No loving mother should take chances with her baby.

Experienced mothers and nurses are aware of the fact that dysentery and diarrhoea come on often with a surprising suddenness in the early autumn.

In order to prevent such attacks, baby's daily diet should be pure Lactated Food. This wonderful nourisher strengthens the stomach and all the organs of digestion, and keeps the baby bright, healthy and vigorous.

To mothers who have weak and delicate babies, we confidently say, give Lactated Food a week's trial, and see what it will do for your little one in the way of building it up. The trial may be the means of saving your darling's life.
