

presents in convenient form what purports to be a complete list of these insects from the North American region. The author has had the co-operation of the leading students in this order in the preparation of the catalogue; the classification and nomenclature employed, therefore, represents the more approved and advanced ideas of odonatologists. The publication is an important one, and will undoubtedly be much sought after. It should be in the hands of all Canadian students of these neuropteroid insects.

A. G.

The Fortieth Annual Report of the Entomological Society of Ontario has recently appeared, and as usual contains much valuable information about the insect pests of Canada, especially those injurious to the crops of the Province of Ontario. As most of the insects, however, are found throughout the Dominion, all can profit by reading the excellent assortment of papers presented.

The report, as formerly, contains a summary of the proceedings of the Annual Meeting, the election of officers, address of the President, reports of different branches, directors, etc., etc., together with the papers read at the meetings.

Among the more important addresses and papers, mention may be made of the following, which appear in the order given: Gibson, Arthur, "Report of Insects of the Year, Division No. I;" Ceasar, L., "Observations on a few Insects of the Season;" Gibson, Arthur, "Nests of the Brown-Tail Moth in Importations of French Nursery Stock, 1909;" Treherne, R. C., "Nursery Work in Ontario;" Morris, F. J. A., "Some Guests at the Banquet of Blossoms;" Hewitt, Dr. C. G., "House Flies and their Allies;" Lyman, H. H., "The Origin and Diffusion of Entomological Errors;" Sanders, G. E., "Conflicts between Ants;" Gibson, Arthur, "The Spruce Bud Worm, *Tortrix fumiferana*, Clem.;" Winn, A. F., "The Snow White Linden Moth;" Swaine, J. M., "Notes on Fruit Tree Scolytids;" Bethune, Prof. C. J. S., "Observations on Ontario Insects in 1909;" Lochhead, Prof. W., "Injurious Insects in Quebec, 1909;" Fyles, Rev. Dr. T. W., "Adaptation in the Structure of Insects;" Jarvis, T. D., "The Acarina, with a host index to the Species found in Ontario;" and "The Entomological Record for 1909," by Arthur Gibson, which fully maintains its high reputation.

The report concludes with a portrait of the late Dr. Brodie, of Toronto, and five other full page plates.
