

Cataphoresis." Mr. Carty gave a short, practical talk, which was very interesting.

Then came a paper by Nikola Tesla. The paper was read by Dr. White of Boston. The subject was "A High Frequency Oscillator for Electro-Therapeutic Purposes." It was received with the closest attention and was one of the most interesting papers presented during the convention. Mr. Tesla's paper was the last read before the association the remainder of those on the programme being read by title.

Dr. Newman of New York and Dr. Nunn of Savannah, Ga., were appointed a committee by the president to conduct the president-elect, Dr. Bishop of Washington, to the chair. Before turning over to his successor the gavel and other insignia of office, Dr. Dickson took occasion to thank the association for its kindness and courtesy to him during his term of office. His little speech was very graceful and sincere, and was received with hearty demonstrations of approval.

Dr. Bishop spoke of the pleasure it afforded him to take the first place in the association, at the head of the governing body. He said that he deeply appreciated the honor that had been shown him and asked for the hearty co-operation and help of all the members.

Shortly after noon the new president of the association declared the eighth annual convention of the American Electro-Therapeutic Association closed.

The social side of the meeting was by no means neglected, Dr. Ernest Wende, Health Commissioner of Buffalo, had charge of the local arrangements for the comfort, convenience and entertainment of the visitors, and too much praise cannot be accorded for the manner in which his plans were carried out.

A public reception in honor of the members was held on Tuesday evening, 13th, in Alumni Hall, University of Buffalo building, which was largely attended, many medical men of Buffalo being present.

The duties of chairman were performed by the President of the Association, Dr. Charles Rea Dickson, of Toronto, who made a few remarks, in which he spoke of the fraternal feeling existing between the two great English-speaking nations at the present time. Dr. Henry R. Hopkins, of Buffalo, a member of the local committee on arrangements, spoke of the earnest work of the medical men in this country. Dr. Robert Newman, of New York, made a brief address, as did Dr. G. Sterling Ryerson of Toronto.
