Company/Product Information

U.S.E. Chemicals, a Division of Thorosystem Products of Canada Limited, and Hickson Building Products Limited are pleased to announce the formation of a joint venture company U.S.E. Hickson Products Ltd.

U.S.E. Chemicals is a manufacturer of a wide range of cementitious coatings, repair and maintenance quick setting cements, bonding agents, and ad mixtures based upon acrylic technology, as well as a complete line of water repellent sealers and asphalt driveway repair and coal tar resurfacing coatings.

Hickson Building Products Limited, Protection Products Division, markets a wide range of caulking, sealants, adhesives, roofing products, and wood preservatives which service the construction industry and the automotive and recreational vehicle aftermarkets.

U.S.E. Hickson Products' manufacturing facilities will be consolidated at a new 80,000 square foot plant, located on a 5.5 acre property. Complete with a rail spur, the new facility will employ the latest computerized high speed filling equipment for both liquids and powders. The corporation's dedication to research and development can be found in the construction of its modern laboratories, where not only will applied research be undertaken but statistical process control techniques will also be utilized throughout the manufacturing procedure. Worker comfort and safety remains a high priority at the new plant where the overall focus will be to manufacture products of the highest quality by the most efficient means.
