

TWO HURT ON VALLEY RAILWAY

Engineer Parlee and Fireman Love Injured Following Bursting of a Steam Pipe.

A serious accident occurred on the Valley Railway yesterday and as a result Engineer Charles E. Parlee, and Fireman Wm. H. Love were quite seriously injured. While the train was proceeding along between Brighton and Oromocto enroute to St. John, one of the large steam pipes burst. Engineer Parlee was partially blinded by the scalding hot steam, but kept his head and started to work forward to shut off the main steam valve. While doing so he lost his hold on the grab iron and fell out of the cab, rolling down and embankment and landing on a pile of ice. In the meanwhile Fireman Love had been partially stunned and when he recovered he missed his engine and jumped to the emergency brake. He just completed setting the brake when he lost his footing and was thrown out of the cab door.

When the train was brought to a stop the conductor and brakeman hurried forward to ascertain what had happened and they found the engineer and fireman lying at the foot of the embankment. They were assisted on board the train where first aid treatment was rendered. In the meanwhile a message was rushed to the nearest operator and word of the accident sent to this city. A relief engine was dispatched to the scene and brought in the train.

Upon its arrival the engineer and fireman were driven to their homes where their injuries were given proper attention. Engineer Parlee was the more seriously hurt. He sustained two deep gashes in the back of his head, broke a small bone in his heel and quite badly strained his back. He is also suffering from shock and the effects of the hot steam. Fireman Love was badly shaken up as a result of his fall from the cab and is also suffering from the steam, a quantity of which went down his throat. Both men are still confined to their beds, but are reported to be resting comfortably.

SCHOONER AT DIGBY DRIVEN ON ROCKY BEACH

(Special to The Times)
Digby, N. S., Jan. 4.—The large tern schooner Gertrude Parsons of Windsor, which came here to load lumber, was torn loose from her wharf this morning by the terrific gale and driven ashore about 12:30 o'clock on the rocky beach between the Salvation Army Barracks and the Red Raven Cafe. She is only a few feet away from the shore and with her masts listed over the street. She is pounding heavily and will likely be seriously damaged; if there is no moderation in the gale she may become a total loss on the next tide. The tide is ebbing and in a short time the water will leave her.

This is proving the worst gale of the season. The streets are blocked with immense drifts and the basin is lashed into fury. The breakwaters along the water front are being torn out in great sections and it will cost hundreds of dollars to repair the damage.
