tain section, or that it does not run through any whole body of the Tax payers? If our Municiother certain section; we can't make one road pass pal Councillors think themselves competent to through every County in the Province. But we deal with a subject from which the most experi-2 do complain that the location was most unwisely enced, ingenious and astute politicians in the Lechosen, and that the expense of construction has gislature might well shrink, let them pay the exbeen far beyond what wisdom and economy should pense of their own whims. If they are particular place. It is quite as much in place, though, as have dictated and secured.

pounds on the construction of a Railway, it should on behalf of the tax-payers of this County, insist pounds on the construction of a Kanway, ushould upon their paying the expense of the indulgence old, conventional mode of doing up the weather, I sincerely thank you for the addresses upon their paying the expense of the indulgence old, conventional mode of doing up the weather, tional, but upon one which would have connected of their own vanity and folly. her great centre of trade and commerce with some of the surrounding states. Had this immense sum been expended in a direction to tap the Grand Trunk of Canada, it would have been well and wisely expended; and the benefits which would have accrued to the whole Province would have far outweighed the expense. We speak without reference to any route, -whether northern, central or western. We should much rather have seen this sum expended on the North Shore or central road than on the route upon which it has been thrown away. There can scarcely be two opinions as to the propriety of selecting the city of St. John, our great commercial metropolis, for the ocean terminus of a Provincial Railway; its commanding position, its commercial importance, and its population are such that it cannot be overlooked. But having fixed one terminus at St. John, the inhabitants of the Province have a right to insist that its location should be such as to ensure its general use-

Our only Provincial railroad, and the only Provincial railroad that we are likely to have for some time, was located by the city of St. John itself. Its men of business and of political influence chose the location; and the city is responsible for their nets. If it is asked how they could have been so blind as to have chosen this location, we can only answer that it is in keeping with their whole public character. Upon which point weshall have something further to say in a future ar-

MUNICIPAL COUNCIL-JULY MEETING. The half yearly meeting of the Municipal Council

of this County took place on the 17th, 18th, and 19th last. The minutes are published in the Scatinel of the 28th. The business transacted by the Council was almost all of a routine nature. A legal opinion from L. P. Fisher on the questions "Can Assessments on non-resident property be collected by legal process? Can they be collected from Estates where the heirs are known or not known (as the case may be), or whether the property be divided or undivided;" was laid before the meeting. The Committee on printing the Bye-Laws reported that the work had been let by tender to Mr. Watts for £15, and that, although hindered by the fire, the contract would soon be completed! Tae new County Auditor, Mr. James H. Jacques, reported that he could not understand the Auditor's Book "placed in his hands in January last." The County grounds or a portion of them, having been fenced in, a committee was appointed to let the enclosed portion for a term of years, Various Justices of the Peace who had not properly accounted for Defaulters lists put in their hands for collection were taken k, and severely-threatened. Sanitary Commissioners for the various Parishes were appointed.

There is one little minute, in the proceedings of the 18th, to which we direct the attention of Tax this clamor and hubbub and rant and invective payers. It runs in this wise: Resolved, that the expenses incident to the preparing and publication of a Bill for the amendment of the Election Law last winter be paid by the County." We think that we have somewhere seen this "Bill," and we recollect very well the amusement which it coited in the House of Assembly, when presented, very near the close of last session. We don't know what the expense of "the preparing and publication," as the Council are pleased to term it, of this valuable "Bill" may have been; but we wenture to suggest to the Rate payers of Carle ton that neither in the Municipal or any other Law is there a word about the preparation, by the Mu nicipal Coancil of the County of Carleton, of Bills affecting the representation of the public in the General Assembly, and that their council lors are only bringing themselves, and those who elect thera, into ridicule, by these continual infermeddlings with things not within their sphere of eperation, and with which they are unterly in Carleton County Granmer sompetent to deal. And what right have they to ed on Monday the 18th

we complain that this road runs through any cer- shove the expenses of their own folly on the TOWN TALK AND COUNTRY TOPICS. Flags are flying from every house, and tarly anxious to render themselves ridiculous in the eyes of the enlightened public of the Proing one million two hundred and fifty thousand vince, we have no great objection; but we shall,

ECCLESIASTICAL PRECEDENCE.

A fearful hubbub has been raised by some of the St. John papers, secular and religious, about the question of ecclesiastical precedence in this Province. It seems that the Synod of the Presbyterian Church of New Brunswick, at its recent meeting, instructed its moderator to apply to His Excellency the Lieutenant Governor for information upon this matter. In reply to this request Mr. Tilley wrote by command of His Excellency, that "according to Imperial rules, which regulate precedence in this and other colonies, the Bishops of the Church England and of the Poman Catholic Church. take precedence next after the officer in commune of Her Majesty's troops; and that the Bishop of he Church of England takes precedence of the Roman Catholic Bishop." The Rev. Mr. Ferrie, a minister of the Presby

terian Church of New Branswick, communicated with some severe and characteristically anti-Po pish observations on the rule as therein set forth. This was the signal for the commencement of furious clamour, the Presbyterian, Religious In telligencer, and Globe waxing fiercely Protestant and fearfully eloquent over such a stigma upon the Protestant sects as that a dignitary of the Roman Catholic Church should have this prece dence. We have always regarded a number of the papers called "religious" as the most un-Christian, bitter, prejudiced, ungenerous, illiberal and upreasonable section of the press; and this discussion strengthens us in the opinion .- But they find an able and most willing condinter in the Globe. This matter is quite a windfall for it. It had worked the land cry to death, and was evidently sadly in want of fresh fact for the fire of sectarian ranco ur, upon the feeding and farning of which it has recently entered with so much Chris tian fervor. Its issue of the 28th last contains a a mificent specimen of the irritating, venemous hate, breeding lucubration. It is a leading arti cle of the stereotyped Scarlet Lady-Anti Christ-Abomination of Desolation-Where of Babylon style, - the style so much affected by ranting field preachers and newspaper polemics whose only object in dealing with the subject of religious differences appears to be to strengthen the prejudices and aggravate the ill-feelings of their easily moved hearers or readers.

We may say at once that we by no means ap prove of the rule of ecclesiastical precedence which appears to be established. We think that as in our Province there is no state church, and no church or churches entitled to any peculiar privileges above others, the question of percedence should be settled in some way which would recognize the claims of each to be put on a footing of perfect equality with all the others. Some ole arrangement might be made which would do justice to all. But if there is any cause of complaint in this matter, why not set about its removalin a calm and rational manner? Why all And why attack so furiously the Reman Catholic Church for an arrangement made by the Governnen; of Great Britain? Why attack or abus myone or anything until we endeavor to have so right that which we believe to be wrong? When we have asked to have the rule amended, and peen refused, it will be time enough to work our elves into a fory about it. Is it not possible or the people and press of New Branswick t arrange a question of precedence without work ng themselves into a fury resembling that of two ipsy polemics discussing a doctrinal question in tap room !

We are glad to see that a portion of both the celigious and secular press incline to po to one the discussion of the question to a more decent occa on, and to treat it with fairn ess and modera-
