Simplex Blade Separator

put into their work of making separators-to produce the best machines possible. While we do not claim that a better will are be used, we do believe that the SIMPLEX is as perfect a splation can make it. That farm folks appreciate these points is evidenced by the increasing popularity of the SIMPLEX. The first requisite of a separator is that it shall actually of perfect and the second second second second second perfect and the first second second second second perfect and the for every drop of his mill. The librate devices prive a larger separating area in the same size charact cardination the simplex turns are assigned on the size second second the simplex turns are assigned on the size second second second but turns as easily are to show arms or sore backs, but turns as easily as in other the simplex turns are seally as the other second second point is to have more second area of solutions. Wouldn't set when the simplex turns are on the simplex turns are seally as the other second second the simplex turns are on the simplex turns or sore backs, but turns as easily as the other simplex turns the turns are used to show more show the short. Wouldn't the use is the addition of separator is possible to the simplex turns or sore backs are well be to have more short the simplex turns or the use at in-a second is during the year. It will cost you nothing and may mean a big asving in dollars and cents.

"Think It Over"

FARM AND DAIRY deals editorially with the problems of the great class of dairy farmers in Canada.

The result is that Farm and Dairy circulation is concentrated in the great dairy districts-in homes and on farms where the expenditure for equipment is 10 to 25 per cent. greater than in mixed farming sections.

Is your campaign planned to concentrate on such homes as these? Think it over.

My Taxes --- Fixing the Ratio of Contribution H Percy Blanchard, Hants Co., N.S.

H Percy Blanchart A LITTLE while ago the office! about forty dollars school tax. Tsend two children to school, a school to the school and the school a Then, why not equally so with the public school? The secretary explains to me that the idea is that the poor man and the rich must .ontribute to-ward the school in propertion to their ward the school in proprior to their wealth; not according to their chil-drem attending. But, assuming this, it is by no means conclusive. I find that when I build a barn, and borrow that when I build a barn, and barrow on mortgage the money from my neighbor, I the poor man in debt for my barn must pay the taxes, and my rich neighbor holding the mortgage oes free

Last spring the road surveyor want-ed twenty dollars as my share of road work. My farm touches the road for only 200 yards. I use the public roads very little. Brown, near by, is truck-ing and driving over the roads all the time; in fact, last year he nearly ruin-the time in fact, last year he nearly ruintime; in fact, ias year to have year to obtain by heavy trucking in the spring. He only pays five dollars. The surveyor explains that because I have a big while house and a new barn and a lot of handsome shade I have a big white house and a new barn and a lot of handsome shade trees, I must pay five times as much as Brown. But my house and barn are not on the street; the trees do not walk down the road. The fact is, that this logic fails to satisfy me. I want to get back to first grainofiles; to find upon what principle a community claims so levy a forced contribution unequal assessments. Now, I at an anarchist. I am astisfy the they low an anarchist. I am astist the induit is to our advantage that do induit videals in a community theold con-tribute to a common fund for a com-mon surpose. More than that, I am mon purpose. More than that, I am satisfied that as individuals we owe a debt to the community for value repaid ceived. Robinson Crusoe paid no taxes; but I do not envy him his independ

dependence. The Principles of Taxation. Taxation as we have it to day is a very modern system. The word 'tariff' is derived from a place at the entrance to the Meditername called Tariffa. There esconsed among the roces was a nest of plates: and evidence and the system of the system of the one entering from the or any the one entering from the or any the presention over the system of the the system of the system of the the system of the system of the the system of the system of the system of the system of the system system of the sy

All near goose that ian the gooteff egs: they numed each infant indus-try. It is a suggestive derivation. In the days af ancient israel there-were two classes of taxes. Rich and poor alike brought, his goal or lamb or temple shekel. Above this came voluntary sitts. Then the other class was the ithe. Every tenth been that year of the flocks, every tenth measure of grath or wine was a tax pay-able by the producer. It was not just because he was rich, nor yet as a thankoffering. It was upon the prin-cipile that "The earth is the Lord's, and the follows thereof." The land belonged to God and was realed to

the user. The diler got what he used, and so, the bigger the crop the more land he used, and vice versa. The tenth measure of wheat or wine was the rent. The bigger the flock, the bigger difference in the flock, the

term measure of wines or wine was the rent. The bigger the flock, the bigger the pasture, and vice versa; and the measure of the increase, one in the second second second second in the second second second second other principle exuncited. We find Him demurring against the itax "Simon," asid He, "of whom do the kings of the earth take custom or tribute? Of their own children, or strangers?" Peter as most of the second of the second second second second in the second second second second of the second second second second in the second second second second the second second second second second of the second second second second of the second second second second it was used when our own Bydiah ma cestors two thousand years and more age or second the upper Euclidence second se ago crossed the upper Euphrates, and in scattered tribes cook their long dourney as Cymri or Angaels or Danes dourney as Cymi or Angaels or Dance until at last they reunited in the weet-ern Isles, the only tax they paid was with the sy'rd in their strong right arm at their chiefkain's call. When at last, in feudal days, the land was di-yided among the nobles the isking' own land maintained the king and seeb noble for his tax or rent promown sane mannamed the sing and each noble for his tax or rent prom-ised for fighting men all his able bodied tenants. The land again was subdivided among the tenants or farmers, and these as rent contributed themeeting to mean the tenants. farmers, and these as real contributes themselves to stand in the ranks at call of king or country. The theory was that the land belong to the kins: in clearer words, to the country or whole community. The users were practically every able bodded man. The noble's castle was not merely his house, it was the fort and refuge in time of danger of the whole tenantry. If his tenants fought for him, he fought for them.

The Beginning of Rent and Taxes. It was not till long years after the Conquest that some one devised - payment in money or produce to the noble, in lieu of military service. The result all the same was to take the result all the same was to take the real tills from the tenant any out it in the noble, and so make the tenant a rent payer at the mercy of the noble landlord. From this was built up titles of ownership to land by which does ensure hay to the owner a rent for one man might own the auto and and user must pay to the owner a rent for its use. It was only a few hundred years ago. What we call the ancient and sacred rights of property are by no means ancient, and by no means accred. This intermediate handowner called was merely an interloper, impudent "middleman," that stood pushed himself in between the ten-

Now upon this hashs I am willing to pay my achool tax, in Drowind fax, the law the Dumithe voice of the people of nature American and the second second of nature Assume that because I have coretain neighbors, certain rail-ways and highways convenient, which means markeds and other advantages, my land has a certain rail of value compared with other lands in better or worse situation. It is upon that railo and pays that I owe rent to the king, my proper landord, on, in other Now upon this basis I am willing to my proper landlord, or, in other words, to the community who require certain contributions for common or On no other whether he call community purposes. community purposes. On no other hards can apy man, whether he call himself handit or bailiff, demand from me a dollar except for service render-ed at my special request and promise to pay.
