

## Pulverizes Three Times Spreads Seven Feet

That's the kind of service you get from the "Nisco" and "New Idea," the spreaders that have specially patented features you can't find on any other spreader in the world.

The double cylinder and the special steel distributor are responsible for this. The double cylinder thoroughly pulverizes the manure and the Steel Distributor spreads it 7 ft. wide. Covers two corn rows at once instead of one. Saves wear and tear on man, horses and machinery. Spreads an acre with a half mile less travel than any other spreader.

Both machines built low down for easy loading. The "Nisco" is only 41 in. to tops of sides yet has 19 in. clearance under conveyor. The "New Idea" is 42 inches at rear wheels. This machine tracks and is a favorite with dairymen in hilly sections.

**Forty points of Unquestioned Superiority** **NISCO** **Takes Three Whacks at the Manure**

The wide wheels on both machines, which afford ample traction power, and our perfect pulverizing mechanism, insures light draft machines that can be hauled ordinarily by 2 horses, or at most 3 on loose ground.

Strong braces at the top and sides prevent cramping of the bearings. The "New Idea" has a steel sill with bearings bolted to it.

Both machines are built for durability and simplicity. Only the best material and workmanship. Two levers and a foot latch operate the machine, giving six changes of feed or throwing the machine entirely out of gear.

**Special Feed Mechanism and Steel Distributor Found Only on the "Nisco" and "New Idea"**

These two features alone are enough to make these spreaders unquestioned leaders. They are patented and cannot be used by anyone else.

**Axle Feed.**—The rear axle turns with the wheels when going forward but is stationary when backing. One end moves the pulverizing cylinder and the other operates the feed. Absolutely smooth spreading and no ratchets clicking to annoy horses.

**Steel Distributor.**—Another special patented feature. Gives a 7 ft. spread so even it looks as though it were sown. Cover two corn rows at once instead of one. Saves time and labor and wear on machinery.

**AGENTS Wanted Everywhere in Canada**  
**Money-Making Offer for Right Man**

Here is the biggest opportunity in history for you to make profit selling spreaders to Canadian farmers. War conditions have forced intensive farming so the farmers can raise twice as great a crop this year as before. This means a record breaking sale of spreaders.

We have built a Canadian plant for prompt shipments. Get lined up now and share the profits. Write for details or if you want a spreader only for your own use send us the name of your regular agent.

## McCormick Haying Machines

**YOUR** haying tools must be strong and steady; they must work easily and smoothly; they must get all the hay and put it into the best shape possible. That is why you should consider McCormick haying machines—mowers, rakes, tedders, side delivery rakes, windrow hay loaders, etc.—for **IHC** hay machines have never been beaten for good work in the field or for durability, at any time or place.

**McCormick** local agents sell these machines. When they sell you a **McCormick** machine for the harvesting of your hay crop, they sell you the best in hay machine design and construction that the market affords. Canadian farmers have called **McCormick** standard for many years. You buy a machine that you can depend upon; that will give you perfectly satisfactory service.

Drop a line to the nearest branch house and we will direct you to the nearest agent handling our machines, and will also send you interesting catalogues on any of these machines you may be interested in.

**"I built this barn right"  
It's lightning-proof**

The Armco Roof, with conductor pipes properly grounded, makes it as safe as a lightning rod. The barn, with siding as well as roof of Armco, American Ingot, Iron is spark-proof. It is repair-proof, for

**ARMCO IRON**  
**Resists Rust**

You will save money and get fire and lightning protection, too, if you use this rust-resisting iron. Armco Roofing resists rust not only because Armco Iron is the purest iron made but because it is the most nearly perfect in respect to evenness and all the other qualities that are the basis of rust-resistance. Bars and sheets showing even the most minute defects are rigidly excluded. The superiority of Armco galvanizing alone justifies your choice of an Armco Roof.

**"Iron Roofs that Resist Rust"**

tells you about all styles of this most durable and economical of iron roofs. Clip the coupon for the book. It is free. You can get Armco Roofing from your hardware dealer or your tinner. If you have any trouble getting what you want write us and we will see that you are supplied.

Many manufacturers use Armco Iron in their products. For instance, you can get Page Wire Fencing of this most durable iron. Tell us what you are interested in and we'll send you full information. Send the coupon in today.
