MANN'S

Broad-Cast Seeder and Harrow Combined.

SOWS OVER SEVEN FEET IN WIDTH.

THE ABOVE CUT REPRESENTS OUR NEW BROAD-CAST SEEDER, with SPRING TOOTH HARROW ATTACHMENT for covering the grain. This Machine we have perfected to meet a growing demand for an implement that will sow broad-cast and complete the work in once passing over the ground. The principle of sowing is the same as that in our well-known Broad-Cast Seeder, while the covering attachment has proved itself to be as complete a success in its work as the Seeder has shown itself to be for sowing.

This Machine may also be used as a Harrow alone, making one of the best Implements of the kind in the market; and by the construction of the Teeth they may be quickly changed to work at any required depth or angle, having a range of from two to six inches in depth of working, thus making a Cultivator or Harrow as required.

In durability, lightness of draft and perfection of its work, we claim for this Machine that it has no superior among the many implements of the kind now before the people.

Order early, as only a limited number are being built for this season's trade.
