Tested With Boiling Water

Every Renfrew-Standard Gasoline Engine is thoroughly tested before shipment. It must show at least 10% more horse-power than it is rated, by an actual brake test, with boiling water in the hopper. This test also proves the soundness of the workmanship. Every

Renfrew-Standard

Engine is also tested for balance. It must be so perfectly balanced that it will run with clock-like precision and smoothness. It must start easily without cranking. In short, the engine must be absolutely right in every particular before our inspectors affix their O.K.'s. If you were at the factory, you might think we were over-particular. But just think what our painstaking and care mean to the purchaser of a Renfrew-Standard Engine. It assures him getting an engine whose reliability has been proven under test—one that will give him great satisfaction.

Write for our engine catalogue. It describes the Renfrew-Standard in detail, and contains information about gasoline engines that every progressive farmer would like to know.
