OUR CURBSTONE OBSERVER ON "ZIONISM.

attention has recently been drawn by the reports of the last Zionist Conference, to this very unique subject. It is a harmless and beautiful chimera; it is the practical expression of an idea that, in all times and under all conditions, has possessed the Jewish mind; it is a serious attempt realizing Dr. Theodore Herzl's dream-a vision of himself, as the second Moses, leading "Israel out of Egypt, and the house of Jacob away from a barbarous people." I am an admirer of every grand conception that emenates from the brain of man; the vaster the scheme, the more difficult the execution, the more numerous the foreseen obstacles, the greater the genius of the one who under-

HOLIC

While I have generally confined my weekly observations to matters of local interest, still there is nothing, dox Jew is as strongly opposed to the Reformed Jew as the Anglican Christian is to the Baptist Christian. to my knowledge, to prevent me from forming opinions concerning subjects of universal concern—and from pen-ning the same for publication. My upon the remains in their difference of the present should ever an emulator of the great "Eagle of Meaux" arise in our nidst. I merely wish to observe that when we hear of such a movement as "Zionism," inaugurated by members of the Jewish race, we must not run away with the idea that all Jews believe in it-or even that all Jews sympathize with it.

It is exactly this lack of unity upon the subject that marks the move ment with foregone failure. In the first place the Jew is a business man cial transactions, and a kind of intuition in all matters that concern takes the work, the more heroic is money, trade, exchange, and such afthe determination of the organizer, fairs. He may be filled to the brim or leader. It may be that the dream with patriotic zeal; he may be even is only a nightmare, or the effects of fanatical upon all that touches his an over-heated imagination ; still religion; he may have the profoundthere is something inspiring in every est contempt for every other form of worship; he may love the "land of sult certain failure, or not - that Israel" and the once glorious city of makes us feel that we are created in Israel's kings, with all the energies the image of our Creator-that there of his Hebrew soul; but these condiis a divine and elevating principle tions of mind and sentiment never once blind him to the facts and the conditions by which he is surrounded, nor lead him into the folly of supposing that his money is capable one, I am not of those who would of purchasing everything that may cast ridicule upon the enthusiasm of come within the range of his desires. those prominent Hebrews, who actuconcentration of action, and unity of

The Jew is far-seeing; he is shrewd; he is careful in his transactions; be they great or small; consequently, he scarcely ever becomes a bad speculator, or a foolish adventurer in the domain of business.

In consequence of this leading char-Mount Zion. Moreover, I have had acteristic of the Hebrew, he may wish, with all his soul, for the re ssion of Palestine, yet he will think twice before he sacrifices a dollar in an enterprise that his experience and sound common sense tell him can never be a success. If money could purchase Jerusalem, it might have been bought generations ago by religious, that they firmly entertain. the millionaire sons of Israel. But money is not all-potent-many opinions to the contrary notwithstanding; there are international questions of paramount importance that would have to be counted with. The map of the world cannot now be altered

by even the most earnest and enohu All the sections of Protestantismsiastic meeting of liberators, regenor nearly all-claim Christ as the erators, or whatever else they choose Messiah and the Founder of Chris- to call themselves. It is absolutely tianity; upon this one point they useless for the learned and wealthy agree, upon every other tenet of reli-gion they differ. They are all Pro-the existing order of things. Ninetestants-inasmuch as they "protest" teen hundred years have rolled over against the One, Holy, Catholic and the descendants of the twelve tribes, Apostolic Church-but no two of and throughout the desert of existthem hold the same doctrines. In a ence, generation after generation of lesser degree, because of a smaller them, has aimlessly wandered-withnumber of sects, all those who be-long to the Hebrew nation, and are During all these long decades the Jews in religion, have one vital Church that the Crucified established point upon which they are united; has been growing in strength, ex-

clusions reached by the professor. He "This is the twontieth century out-come of the most remarkable tri-umph of nineteenth century science, the tracing of the origin of life to a few cell animals. The evolution of higher forms of life was simply a di-vision of labor among cells. When Robinson Crusce was on the desert island he had to be a tailor, shoemaker, cook and all. The cne cell infusorium in the water of a swamp is the Robinson Crusce of or-ganic life. After centuries of progress social man has divided labor so that each individual is served by tailors, shoe-makers, cooks, etc., saving time and labor by doing that for which he is best fitted, and concentrating his en-ergies.

ergies. By this social economy progress is made possible far beyond anything that Robinson Crusoe could accom-

If the stomach is the cause of all life, it is well for every one to have a good understanding of it. Almost any one looking, say at the

Almost any one looking, say at the stomach of a goose, knows that its purpose is the reception and diges-tion of food—but here his knowledge stops. He does not even know what the walls of this stomach consists of and if asked will reply : "Of flesh." But what then is this "flesh?" Tell him to place this bit of goose stom-ach in a certain breneration under a ach in a certain breparation, under a microscope, and a whole world of wonders lies before his eyes. Under the guidance of the scientist he at last sees that the wall of the stom-ach, which he had called "fiesh," is a series of cells

a series of cells. And the scientist will tell him that what is true of the stomach is true of all the rest of the body of goose or man; the cells in various arrange-ment and countless multitude make up the whole being. Here is a wonderful complex thing, but immediately any one who is in

but immediately any one who is in-terested in the first stages of life will ask

"How, then, did this complexity start?

"The cell is the real original being. and all higher creatures are nothing but the associated development of a number of cells. The oak and the number of cents. The oak and the man are but enormous "states" of millions on millions of cells, the or-iginal creatures. The elementary or-ganism, then, behind all living things which existed on earth millions of Wars are was a cull creature a size years ago was a cell creature, a sin-gle cell. That no such animal is found now does not prove anything to the contrary, for it is axiomatic with evolution that the earlier and simpler types die out altogether as they give way to the higher develop-ments.

ments. Yet we see something like this or-Yet we see something like this or-iginal animal in the so-called infuso-ria of every street puddle or country marsh, or in the bacillus, consisting sometimes of a single cell, which multiplies by dividing itself. Man is merely a problem in addi-tion or multiplication of cells. But this is only one side of the question. There is also a special line of evolution in the division of labor among the multiplied cells. The cells of the mass gather in groups, for

among the multiplied cells. The cells of the mass gather in groups, for this division of labor, and each group does nothing but its special work. This is the secret of the deva-lopment of the organs of higher or-ganisms or creatures. These organs are the result of a bichly specialized evolution. They presentative sets forth most convin-cingly and attractively the articles of his church government and creed. The church is located in the thrifty and populous community at Steele, near Decatur, Ind. It is being erected highly They

y specialized evolution. They in the great process of evoluarise in the great process of evolu-tion from the primitive creature of a single cell to the oak, the goose or man, upon the ground of the division of labor applied everywhere in the economy of nature on account of its termendeum utility

come a higher animal—it was deve-loped in some form by which a group of cells in the whole cellular mass undertook the work of digestion, and developed this special function. So it is now apparent how the or-igin of the stomach accounts also for the origin of all human and animal life."

Importations for this season comprise patterns and colorings of even more than usual merit and attractiveness. which will afford improved opportunity for selection by all classes of trade.

THE ORIGIN OF LIFE.

So-called philosophers are every day seeking to discover something new, something to attract public ati-tention towards themselves, some-thing that may aid in effacing God from the records of life. The latest philosophic fad is that of Prof. Wil-liam Boelsche, of the University of Leipsic, who claims that animal and human life is derived from the stom-ach. The theory is elaborated in a most mystifying article of several columns; this is the article in quest tion --scientists have been search-a century through the whole for the cause of the origin the secret has been at our

eat, it may be said to be all stom-beam of the second state of th

life." Here is materialism—mother of patheism—pure and simple. It is the theory of evolution applied to human life. We have passed over columns of explanations that amount to nothing; but we must soon be moving, if we do not want to have the sin-deep. profundity overrun Eu-rope—even as the barbarians under Attila overran it centuries ago. It does not require any extensive argu-ment to confound the learned scien-tist. The origin of the subject may be traced to the lowest grade of ani-man is really "a problem in addi-tion or. multiplication of cells" — which we deny—whence came all the cells? If from one tiny original cell, whence, or how came that one into existence? The erudite professor would seem to deny the fact of crea-tion; yet some power must have cre-ated the first cell! Why not at once say "it was God."

ARE YOU LOSING FLESH ?

Then something is wrong. To the young it always means trouble. It is a warning to any one unless they are already too fat. Scott's Enul-sion checks this waste and brings up your weight again.

Our display of Furniture in new designs is one of the finest in Canada, and we would specially invite your inspection both of quality and prices.

tions represented in the neighborhood will each send one of the best speak-ers to the church, and these will, in their turns, argue the merits of their respective sects and will plead with the church members for the owner-ship of the church edifice. After all the speakers have been heard the de-nomination receiving the largest number of votes will receive a deed for the property.
