

THE
Manitoba
GASOLINE ENGINES

Never fail to satisfy. Are made in every size for all kinds of work. Are Simple, Reliable and Durable, Hopper Cooled and Frost Proof.

The latest addition to our line is
The Manitoba Farm Pump Engine

A 1½ h.p. air cooled combination engine and pump jack. Can be attached to any iron pump in two minutes. Just the thing needed on every farm. Will pump your water, run your cream separator, churn, fanning mill, grindstone, etc. Always ready for business. Works just as well in mid-winter as in summer.

Write to-day for Special Engine Catalog G.

We also manufacture
Power and Pumping Windmills, Grain Grinders, Steel Saw Frames, Pumps, Etc.

THE MANITOBA WINDMILL & PUMP CO., LTD.
Box 301
BRANDON, MAN.

It Pumps Life Into You

Wake up, you drug fiend, and let your reason prevail. Your experience with drugs teaches you that you must cast them aside and look for a natural method. When your health failed it seemed inherent by nature for you to look for some magic cure—something that you could take into your stomach to do the work of your digestive organs, bowels, liver and kidneys.

The first dose brought you relief, but with each succeeding dose you found the effect lessened, until you are now down and out, a perfect invalid, for you have allowed drugs to do the work of your vital organs, and without them you are even in a worse condition than when you began.

I can take a man like you and pump new energy into your body while you sleep, and in a few weeks you will be transformed into a giant of strength and courage. Energy is but electricity, and if you lack energy you need electricity.

Dear Sir:—I write to let you know that your Belt has cured me, and I am entirely satisfied with your treatment. I then gave it to my sister to wear, and she, too, was entirely cured, after being treated by many different doctors, and also being told that she would have to go under an operation, to which she would not consent. She used your Belt and was entirely cured.

JOHN W. THIBAUT, Bruce Mines, Ont.

If you feel tired and stupid, with no ambition to get out and hustle; if you have spells of despondency, and a desire to give up the fight, you need new energy. The race is to the strong. Show me a failure and I'll show you a weakling, lacking in courage, strength and ambition, three essentials to the make-up of a successful man.

My Belt is an appliance for infusing a powerful, but soothing, current into the body without the least shock or unpleasant sensation. You can use it two to eight hours every day and waste no time—you need not be conscious that you are taking treatment. It is cheaper than a course of drugging.

GET IT FREE

Cut out this coupon and mail it to me for my 80-page illustrated book of information.

This book tells all about my remedy, how it cures and price of treatment. It is absolutely free, and I'll pay the postage.

Advocate ads give good results

Cock Birds.—All male birds having hard spurs firmly attached to the leg, including mature birds, without reference to age.

Capons.—Birds successfully caponized when from six to twelve weeks old, showing very little comb and no spurs.

Slips.—Birds not successfully caponized and so showing comb, spurs, and generally coarser than capons.

Ducks are divided into two classes, ducklings and ducks.

Ducklings.—Ducks marketed before their first molt, usually from seven to twelve weeks old and weighing from three to five pounds each.

Ducks.—All ducks not included under the term duckling.

Geese are divided into two classes, goslings and geese.

Goslings.—Geese marketed before their first molt, usually from seven to twelve weeks old and weighing from seven to twelve pounds.

Geese.—(a) Under ten pounds; (b) over ten pounds.

Turkeys are divided into young and old hen turkeys and young and old toms. Young hens, all weights; young toms, under twelve pounds; old hens, all weights; old toms, all weights.

Guineas are divided into young and old.

Pigeons are divided into squabs and pigeons.

Baby Eczema Skin Irritations

Splendid Results by Using Dr. Chase's Ointment, the Greatest of Healers

Thoughtful mothers are forsaking pore-clogging and unsanitary powders for the use of Dr. Chase's Ointment and find there is no treatment so effective for chafed and irritated skin, scald head and eczema.

This ointment makes the skin soft and smooth and ensures healthful, natural action of the pores of the skin.

A trial of Dr. Chase's Ointment is usually enough to convince anyone that there is nothing like it as a beautifier of the skin and as a means of overcoming painful and annoying itching skin diseases.

It is so pure and clean, so delightfully soothing and healing and so pleasant to use that it soon finds a permanent place in every home where its merits become known. 60 cents a box, all dealers, or Edmanson, Bates & Co., Toronto. Write for a free copy of Dr. Chase's Recipes.

OFFICERS OF THE B. C. POULTRYMEN'S ASSOCIATION

Squabs.—Pigeons up to the time of leaving the nest, usually about four weeks old.

Pigeons.—Birds after they have left the nest.

GRADING.

All the above classes of poultry are graded before being packed, and a standard is set which applies to these classes. There are four grades, viz., selects, No. 1, No. 2 and common.

All the birds must be packed uniformly as to size and weights in each package, a uniform weight to mean birds that do not vary more than one pound in weight. Birds that have been sick or show any indication of disease, birds that have food in the crop, that have decidedly crooked breast bones, that have blood or other dirt upon their bodies, heads or feet, shall not be included in these grades.

All birds must be dry-picked. Roasters and fowl clean except around the neck. Capons should be dressed capon style. By this is meant the style that has become standard and which requires that the feathers be allowed to remain on a considerable portion of the bird. Leave the feathers on the upper half of the neck. Pick the breast clean, pick around the vent and up to the large tail feathers. Pick the entire underside of the wing, all three joints; pick the upper part of the first joint next to the body. Leave the feathers on the upper part of the last two joints, including the long wing feathers or flights. Leave the saddle feathers on the back to within 2½ or 3 inches of the tail.

Cooling should be done gradually but thoroughly before packing, not dipped in water. All classes should be put on the market undrawn, having head and feet on.

Packages must be distinctly marked, showing the class, the grade, the number, the average weight and the gross, tare and net weight they contain. Following is a suggestion:

GRADED DRESSED POULTRY

Put up by
THE POULTRY PRODUCERS' ASSOCIATION OF CANADA

Class	Grade
No.	Av. Wt.
Gross Wt.	Tare
Net	

Selects.—To consist of specially fattened birds, extra well-fleshed and of superior finish and appearance, unbroken skin, without blemish, straight breast bone and neatly packed in packages that hold one dozen birds. Each package shall include birds of a uniform size and color of flesh and legs.

No. 1.—To consist of well-fleshed birds, of neat appearance, but lacking the uniform finish of selects. Packed in neat boxes holding one dozen birds, of uniform size and weight.

No. 2.—To consist of fairly-fleshed birds, packed in neat boxes holding one dozen.

Common.—To consist of any birds not conforming to the requirements of the above three grades, but must not be packed in boxes similar to the other grades.

F. C. ELFDOR, Macdonald College.
