

HIS WIFE'S LUNGS BOTH AFFECTED

But the Great Consumptive Preventative brought Health and Happiness to his Home

"Our doctor said there was no cure for my wife as both her lungs were affected," says Mr. L. H. Walter, of Pearl Street, Brockville, Ont. "It was a sad disappointment to us both, just starting out in life, only married a short time. But before she had finished the first bottle of Psychine the pain in her lungs quickly went away, and after taking six bottles Mrs. Walter was a new creature and perfectly well again."

That is just one of the many families into which Psychine has brought hope, health and happiness. It is a living proof that Psychine cures Consumption. But don't wait for Consumption. Cure your LaGrippe, your Cough, your Bronchitis, your Catarrh, or your Pneumonia with the remedy that never fails—

PSYCHINE

(Pronounced Si-keen)

50c. Per Bottle

Ring-Bone

There is no case so old or bad that we will not guarantee

Fleming's Spavin and Ringbone Paste to remove the lameness and make the horse go sound. Money refunded if it ever fails. Easy to use and one to three 45-minute applications cure. Works just as well on Sidebone and Bone Spavin. Before ordering or buying any kind of a remedy for any kind of a blemish, write for a free copy of

Fleming's Vest-Pocket Veterinary Adviser
Ninety-six pages of veterinary information with special attention to the treatment of blemishes. Durable bound, indexed and illustrated. Make a right beginning by sending for this book.

FLEMING BROS., Chemists,
45 Church Street,

to treat it satisfactorily. If it is round calculi (stone in the kidneys) or any other chronic disease of the organs, the treatment is not likely to be successful. If you are not within reach of a veterinary surgeon, would advise you to give soft laxative food, morning and evening containing a teaspoonful of flaxseed, boiled and into each ration put bicarbonate of potassium, half ounce. Continue treatment for two or three weeks.

TUBERCULOSIS OR PNEUMONIA.

I have a cow took sick about a month ago. She had a slight cough which gradually got worse until one evening she coughed up a quantity of clotted blood and ran blood at the nose for three or four days. I gave her a bottle of linseed oil when the bleeding stopped. Had no appetite, cough got worse, got gradually weaker and then slipped her calf. A neighbor came along and said it might be tuberculosis so I shot her. Please let me know through your paper what was the trouble and you will greatly oblige

SUBSCRIBER.

Ans.—The profuse hemorrhage may have been caused by the ravages of tuberculosis, or from the destruction of the lung tissue by pneumonia, or sporadic pleura pneumonia. However, without a post mortem examination the real cause of the trouble could not to a certainty be demonstrated.

SICK RABBIT.

I have a rabbit of about six months and a half old. A short time ago I noticed a slight swelling on the upper side of the lower lip; I thought little of it at the time but was startled a few days after when I noticed a little lump about the size of a bean and of great hardness in the same place as the swelling was. Other symptoms followed rapidly, such as constant twitching of its left side, uttering sharp and piercing shrieks. Please send medical advice in next issue of the ADVOCATE.

Alta. Miss N. V.

Ans.—Get your big brother or the big brother of some one else to suspend the little animal by grasping its hind legs with his left hand, and then with a stick about eighteen inches in length and about three quarters of an inch in diameter, in his right hand, strike it a smart blow on the back of the head immediately behind the ears. This you will find to be a sure and sudden way to effectually relieve the suffering of poor bunny.

SUPPOSED LEUCORRHOEA.

I have a pregnant mare that has the whites.

A. R.

Ans.—While it may be possible for a mare with leucorrhœa to conceive, it is highly improbable, and if such did occur, local treatment would cause abortion. I would advise you to give her 30 drops of carbolic acid dissolved in a pint of cold water and sprinkled on her food twice daily, and not attempt local treatment. If she is not in foal, flush the womb out twice weekly with two gallons of a two-per-cent. solution of Zenoleum heated to 100 degrees Fahr., and introduced with an injection pump or syringe with a long nozzle.

CURB.

What can we get to apply on mare just beginning to show a curb? Have you any experience with Absorbine and where can it be procured?

L. B. S.

Ans.—The biniodide of mercury blister, 1 to 6 is quite frequently used and with good results. Re Absorbine we have never used it but several others have and have a favorable opinion of it, see advertisements of the preparation.

SCABBY PIGS.

I have two sows three month old, fed night and morning, they eat well but have got a thick coat of scurf on their sides. When itchy they rub themselves sore. Can you give a remedy? I got some sweepings from the mill with a deal of flour in it. Should like to know if it is good for them.

Sask. E. H.

Ans.—Your pigs are affected with

IMPORTANT AUCTION SALE

OF

Imported and Canadian Bred REGISTERED

CLYDESDALE MARES

AT
