

ALPHA

The easiest gas engine to operate and care for

THE farmer wants an engine that is simple and reliable, that will do what he wants it to do without constant tinkering and adjustment.

He gets such an engine when he buys an Alpha. The Alpha is a thoroughly practical engine. It is designed and built to do its work day in and day out under the varying conditions it is called upon to meet on the farm. It is dependable at all times.

The trouble-making features found in many so-called "farm" engines have been avoided in the Alpha. It contains no delicate electric batteries but starts and runs on a simple low-speed magneto, guaranteed for the life of the engine.

The same idea of simplicity and durability has been carried out all through the Alpha. Every part is designed to do its work with little or no attention and to stand up under hard work.

One big feature of the Alpha is its low fuel consumption. Whether you are using gasoline, alcohol or kerosene, the Alpha is a fuel saver.

Write today for our large illustrated engine catalogue, which shows you every detail of the ALPHA and explains just why you get more for your money in it than in any other engine.

Alpha Gas Engines are made in eleven sizes, 2 to 25 H. P., and each size is furnished in stationary, semi-portable, or portable style, with hopper or tank-cooled cylinder.

THE DE LAVAL COMPANY, Ltd.

Ask Yourself The Following Questions

When was I threshed last year? How much fall plowing did I do and how much more could I have done if I had been threshed earlier? How much was my threshing bill last fall and what will I have to pay this year? What have I to show for it? What have I to show for the money paid in threshing bills in previous years? Did I have all of my grain in the granary or didn't I have a lot in the strawpile? If I had saved all my grain how much ahead would I be? It is not necessary for you to send us your reply. We know the answer. But by purchasing one of the **Moody Small Threshing Outfits NOW** you will be able to give satisfactory answers to these questions in the future.

Don't forget the **Moody** sells at prices which defy competition, and the workmanship and the quality and quantity of the work which this machine will do is fully guaranteed.

The **Moody** is made in three sizes, viz. 24 x 32 in., 30 x 34 in. and 36 x 40 in. equipped with either wind stacker or straw carrier. Note the cut which shows the wood seed bagger. This keeps the land clean by putting all the wood seeds in a bag separate from the straw.

We have a full line of quality seed and planting gear on hand. The engine can be used separately or mounted on the same truck with the separator.

Look for the **Moody** sign and the **Moody** Outfit at the Regina and Saskatoon Fairs.

The Farmers' Phone

Gives Unequaled Service

Stock at Regina

KELLOGG Code No. 2839 farm line telephone is especially built for the rural line. It will give the highest grade service whenever called upon—today, tomorrow, in fact, indefinitely. The cabinet is of sturdy, well seasoned and handsomely finished quartered oak, equipped with Kellogg standard apparatus; Kellogg standard long distance transmitter (over two million of one type in use); powerful five bar generator, reliable and durable receiver with Kellogg Bakelite shell. This telephone gives the most reliable service with the least amount of repairs. Its use throughout the world proves it the unequalled farm line telephone.

"Use Is The Test"

We have a stock of these profit making telephones at Regina, Saskatchewan, ready for immediate shipment and also a complete line of telephone supplies. Your orders and inquiries will receive our prompt, intelligent attention.

Do you need wire, pole or line hardware, tools, batteries, etc.? Our line supplies are of the very best quality, and selected by experienced, practical telephone men—prompt shipments assured.

A selected stock for renewals and extensions, with switchboards and telephones, ordered now will mean a saving and enable you to give better service. Order at once.

We issue a booklet entitled "How to Organize a Rural Telephone Company," which we will forward on request.

Manufacturers of Standard Telephone Equipment.

Buy Early This Year

THIS year, Canadian farmers have need of first-class equipment in harvesting machines, twine, and binder repairs. Buy none but well-known, long-tried machines and buy early.

Buy good twine, and buy it now. This is no time to be thinking about saving a cent or two on twine, but to think of the dollars that good twine will save in the field. Our advice to every farmer is to buy at once the full amount he is going to need, and not alone to buy it, but to go to the dealer, get it, and take it home.

McCormick binders now cost less in the amount of farm produce required to buy them than ever before. But prices of all manufactured goods are likely to go higher without much warning, while there is no chance at all for them to go lower this season. The safe thing to do, therefore, is to buy now, at present prices, for immediate delivery.

Your local dealer has done his share to insure the harvesting of your grain. See him as soon as you can and arrange for the repairs, twine, or new machines you are going to need this year.
