Canon McColl's Experience in Ireland.

Canon McColl's Experience in Ireland. Rev. Malcolm McColl, rector of St. George's, London, and Canon of Ripon, speaking at Nantwich on Home Rule, said he was interested in some Irish property, on which the "plan of campaign" had been put into force. (Laughter.) He was not going to denounce or to defend the plan, but he would tell them what happened in his own case. He allowed an agent for foolin' me yez air. Sech a noice gintilma as yourself wouldn't desave a poor orphin girrl wid nayther fayther or mother." but he would tell them what happened in his own case. He allowed an agent to manage that property, and a short time ago six of the proper tenants offered the agent 50 per cent. of the rent, but the agent refused to accept it. The agent would have had recourse to eviction, but he could not do that without his (the speak-er's) consent, and he had the agent before him and questioned him. He found out that the tenants had been on the farms for twenty-five years; that my motives mercenary, I carefully refrained from alluding to her newly-acquired wealth. Indeed, I began to suspect that she had not yet heard of her good fortune. She finally promised to marry me, and the wedding was to take place in one week. Before the eventful day arrived I questioned Maggie concerning her relatives in the old country. " Relatives, is it? she said. 'Shure an' Oi have lashins of 'em ; but, begorra, they are as poor as Misther Job's turkey. An' Oi have a rilative in this country, too—an' that same is a big brother in this city; an', upon me honor, he's that shtrong an' quick wid his two fasts that Oi belave he could knock out John Sullivan himself.' " But, Maggie,' I anziously inquired, ' haven't you any rich uncles in Ireland ?' " Rich uncles, is it? Faith and Oi out out that the tenants had been on the farms for twenty-five years; that it was originally bog land, and their rentwas 6d per acre, and that for the past ten years the rent charged had been  $\pounds 1$  per acre. The last question he put to the agent was this: Supposing the landlord had paid the tenants as laborers to till the land, what would be the worth of that land now? be the worth of that land now? The agent replied, 7s per acre. Then, says he, it seems you have been robbing the tenants of 13s per acre for ten years. He held that it was complete robbery, and no sooner had he made the reduction than the tenants \_ immediately retired from the " plan of campaign," paid their rents, and there were peace and harmony on that pro-perty now. (Cheers.) He put these facts before a very prominent Liberal-Unionist.

<sup>4</sup> haven't you any rich uncles in Ireland ( <sup>4</sup> Rich uncles, is it? Faith and Oi have only one uncle an' he's in the poor-house,' replied Maggie, with painful frank-ness. Then I showed her the newspaper paragraph, but the 'comely and intelligent' girl couldn't read. When apprised of its purport the spickered and said : perty now before a very prominent Liberal-Unionist, with the question. Did he do right or that he did right. (Cheers.)

"The newspapers," he said, in a lugub-rious tone, in reply to his friend's ques-tioning look, "have wrecked my happiness, and I'll soon be a weary wanderer upon the face of the earth. If there is an expedition fitting out to go in search of the North Pole I want to join it, and starve and freeze to death a few degrees farther north than any other reckless explorer has ever reached. Not being an impecuni-ous English lord, nor an Italian count with "This announcement was more to the point than either of the preceding two. 'Officially notified of her good fortune, and will soon, come into possession of the money.' There was something tangible about that. There could be no mistake this time. With buoyant hopes and my best suit of clothes, I started for Clayton. I hardly know how it happened, but I was not in the town twenty-four hours before I met Miss Bellville. That part of the paragraph in relation to her personal apous English ford, nor at training could write a name much longer than his purse, I fully realized that the fulfilment of this resolu-tion was no easy task. I am simply an American, with an average amount of brains, and a respectable butrather plebeian name, and an American heiress doesn't not in the town twenty-four hours before I met Miss Bellville. That part of the paragraph in relation to her personal ap-pearance was true—she was young and pretty. She was also a seam-stress, and was still employed at her trade. She had plenty of suitors, but she showed a preference for me. I felt highly-flattered at being thus honored, and I must confess that I began to feel something more than a friendship for the girl. I found myself unconsciously writing the name 'Mamie' on scraps of paper and on the margins of newspapers when alone. The young lady was bright and intelligent, as well as young and pretty. But why did she continue to industriously ply the needle if she was a \$600,000 heiress? There was something suspicious in that fact. Per-haps it was a scheme to keep fortune hunters at a distance. I was falling head over heels in love with the girl, and when, name, and an American heiress doesn't look favorably upon such a suitor, unless he should happen to be employed as her father's coachman. While wondering how encountered this paragraph in a daily paper : "Miss Maggie O'Rackett, a young, comel

I proceeded at once to Cincinnati and registered at the Blank Hotel. When I first beheld the 'young comely Maggie,' my hopes almost fell to zero. She was about 35 years old, hunters at a distance. I was taking heat over heels in love with the girl, and when, a few weeks after my arrival in Clayton, I asked her to be my wife, she looked tenderly into my eyes and said in a tone of frankhad decidedly warm hair, a cast in one eye

had decidedly warm hair, a cast in one eye, and no upper front teeth. Her brogue was thick and her hands large and red. She was a'most homely enough to carry off the first prize at a formale beauty show. But it is really won-derful how much feminine ugliness a fortune of \$500,000 will successfully con-ceal. When I remembered Maggie's money, her personal blemishes disappeared as if by magic. There was after all, some-thing about her that was interesting and attractive. I soon made her acquaintance, and when, a few days later, I asked her to be my wife, she gave me an amazed look "Tom, our acquaintance has been very brief-too short, in truth, to take such an brief-too short, in truth, to take such an important step as you propose. I am a poor girl, without father or mother, sister or brother. A ridiculous report has been printed in the newspapers that I have inherited a fortune of \$600,000 by the death of a brother in Australia. I wish it were of a brother in Australia. I wish it were true for your sake. The report has brought me many suitors, but when I told them it was an error they soon faded away. For fear she would think my motives mercenary, I carefully refrained from alluding to her newly-acquired wealth. "Well, the girl had no big brother or stern father to put on your trail, anyway," said his friend, consolingly. "No," moaned Tom, "but she lied to try her 'lovers' when she said that she had not inherited a fortune of \$600,000, and I was her last victim ! Last week she married a young man who did not care for wealth, and now he is spending her \$600,000, and I really loved her, too." At the evening session it was decided to call the organization "The Permanent Canadian Farmers' Institute of Ontario," and these officers were elected: President, V. E. The most important business was the consideration of the trade relations existing between the Dominion and the United States, and the famers in discussing the question showed a lively appreciation of the matter in so far as it affected their in-terests. As the resolution adopted will show, they are unanimously in favor of a broader trade policy with United States. The debate was introduced by Messrs. "Rusty" Collins, as he is known to the police of western cities and the officers of the law, has spent most of his life in prison. He returned here two months ago from serving a sentence in the Allegheny Penitentiary. Ross Trainor, while with school companions, met the ugly ex-convict on the street. He was pointed out to her as a late release from prison. At first sight she seems to have conceived a strange passion for him and she took the first opportunity to make his acquaintance. He was wary, thinking her attentions were a trap of some kind set for his benefit by detectives. But she soon undeceived him, leaving home, friends and the surroundings of a comfortable home to follow his fortunes. She was found in his company soon after she left home and was taken in custody and returned to her parents. In her rage at being separated from him she poured petroleum into her piano and set fire to it, destroying the instrument and nearly burning the house over her parents' heads. She escaped from home again about two weeks ago with the assistance of her strange lover. They disappeared then, but returned here last night. James Trainor, her father, got a warrant for their arrest, and Rosa and "Rusty" were captured. He yielded, but Rosa fought like a little demon, and when her father appeared she was scized with this strange infatuation she had bore the character of a virtuous and more than ordin. out; all others who have handled the ball get credit of assists. When the bases are not occupied by base run-ners, if the eatcher drop or pass the ball on the fourth strike and cannot recover in time to field the runner out at first base, it counts as an error; but should he recover it in time and should he field the ball perfectly to the first base and the baseman fails to put out the runner, give the error to the baseman and credit the catabler with an assist. In the above cases give the jitcher credit for a strike-out in the summary and an assist in the assist column. The expression "handles the ball," in the same section, is construed to mean if the ball has touched any part of a fielder's person, enabling another fielder to put out ab asser runner. When two men are out and a batsman makes a safe hit for two or more bases, sending home any men who may be on bases, their runs do not running within the 45-foot lines or for not touch-ing first base, for that is construed as being put out "before reaching first base." Errors should be given to a fielder in case a ball is fielded to first base. Scorers' attention is particularly called to sec-tion 7 of rule 55 in reference to scoring battery errors.

At a meeting of commanding officers, held in Montreal, it was decided to hold a grand field day, parade and review of all the regiments in the fifth and sixth mili-tary districts on June 21st, in celebration of the Queen's Jubilee.

"Gentlemen of the jury," once said an old time Judge in Mobile. "The lawyers have been here two whole days discussin the constitutionality of the law under which this suit was brought. You have nothin to do with that. All you have to ascertain is whether the man got the money. If did he ought to pay it. Take the case."

In the new residences at Montreal of Sin Geo. Stephen, Sir Donald. A. Smith, R. R. Angus and others, wires for using the in-candescent electric light were placed. A company has been organized with a capital stock of about \$100,000, and all the capital stock practically taken by these gentlemen. Mr. W. C. VanHorne and others proposed to use the Edison system. Engine stations will be built at various points, and private houses supplied as well as banks, large business houses, factories, etc. The system will be in operation by autumn.
