> Lyman's Emulsion of Cod Liver Oil and I INEN TABLE DAMASKS; Damask Table t is a means of enriching the blood and counteracting a hereditary tendency to consumption. In every part of the Dominion and throughout the United States it has attained a popularity as wide-spread as it is deserved, and the evidence attesting its efficacy is voluminous and convincing. The Cod Liver Oil, which is its pulmonic constituent, is absolutely pure and elemically blended with this ingredient, possess invigorating properties which render it most desirable in diseases involving t such a tremendous waste of tissue- and loss of bodily substance as incipient consumption, which it checks with a promptitude truly marvellous. In addition to its pulmonic effects, it imparts tone to the whole system, and being a fine blood depurent, counteracts a tendency to scrofula. Moreover, it is sold-at a Tessonable price, the cost of the smaller bottles (the contents of one often sufficing to break up a bad cold) being 50 cents, and of the larger, \$1.00.
