Projected Attack upon the Ontario Par-liament Buildings. Last week the news was wired from Hali fax that a warning had been received there that an attempt was to be made by Fenians to blow up the Government House and other public buildings in that city. About the same time the provincial authorities in Toronto were apprized that a plot was being perfected by Femans at Buffalo to destroy the Provincial Parliament buildings and Govthe Frovincial Farlament buildings and Gov-ernment House by dynamits. The Govern-ment did not place much reliance upon the story, but decided that it would be well to take precautions against any possible attack which might be made.

This was thought advisable, it is presumed not because of the value or architectura beauty of the old pile, but because of the valuable records which are preserved therein. The Government detective staff, under Mr Murray, were put on duty, and special constables were placed on patrol in and around Government House and the Parliament buildings. Six men were put on duty on Wednesday of last week, and have been continued ever since. Three of them go on at six o'clock in the evening and continue until nine o'clock, when they are relieved and the other three take their places, and so on every three

hours until morning. THE GUARD ROOM is in the coach-house of Government house, where the men have sleeping accommodation, and are provided with refreshments. Colonel Gilmour, Clerk of the House, and Captain Delamere, postmaster, visit the men on their beats at different hours. During the day the Ontario Government detectives keep watch around the buildings. The whole staff are under the direction of Detective Murray. Extra precautions have also been taken at Osgoode hall, the Educational Department, and other public offices. The men at the Parliament buildings have been very vigilant. and being strangers to those connected with the departments, have challenged, among thers, some of the inmates. One young man was going to his quarters

He stopped the young man and asked where he was going and what he had in the parcel. The young fellow, not knowing his question-cr, replied, "What the deuce do you want to know for?" But it was no use; he was obliged to explain, and the mysterious package was found to be butter. Others were stopped in the same way. The members of the Government, when spoken to about the matter, refused all information. The affair was really kept so quiet that some of the being mounted for several days. It was not until Monday that the members of the House generally became aware of what was being done. They pooh-pooh the idea of anything serious being attempted. The city detectives are also keeping a watch on all parties entering the city, and are in constant attendance at all the railway stations.
