examination in the various subjects had been and left it for him to chaw on.

Trading in Alexandria

Arthur Sullivan bought a carpet in Alexandria, and the purchase took him three months. One morning, so runs his narrative, he was passing by one of the bazaars where tapestries and such things and rich fabric caught his eye. He went in, and after pretending to look over a lot of things which in reality he did not want, he said to the man who solemnly presided over the place, "And what is the price of that carpet?"

"That," responded the dealer, "is not for sale. I purchased that particular carmost exciting game of the season. More pet at a great cost to feast my own eyes upon. It is magnificent-superb. I could not part with that. No, by Allah!" or words to that effect. "Will the English gentleman have a cup of coffee?" The English gentleman would. He would also have a cigarette. After that he went away. In a day or two he came around again, and once more made the pretence of looking through Macdalleh's stock. He had obviously failed to fool the sly Egyptian before as to the article he really wanted, so he took more time to do it upon this occasion. As he expected, the sedate owner of the bazaar finally approached

> "I have concluded after several sleepless nights," said the merchant, "to part with that carpet. It grieves me very much to do so, for I have become very fond of it. I had hoped it would have been the light of my eyes in my old age. But the Prophet has counselled unselfishness among his people, and I will sell to the English gentleman."

"How much?" "One hundred pounds." "Nonsense. I'll give you £5."

The Egyptian's dignity was obviously wounded. An expression of absolute pain crossed his face. But he forgave Arthur. and they had another cup of coffee and a cigarette together, Then Arthur went away as before. In a week or so he again dropped in. After going through the regular business of looking-over the stock,

he was again approached by Macdullah. "I have concluded, after much thought, that I asked you too much for the carpet the other day," said that worthy. "When Macdullah feels he is in the wrong he is quick to acknowledge it. The English gentleman can have the beautiful ca rpet

for £90." "Now you acknowledge your error, replied Mr. Sullivan, "I will confess that make concession, I will do the same.

Instead of £5 I will give you £6." More coffee and another cigarette. The next time Mr. Sullivan went around who came to this Province in 1783, and set-
