The empress was very much amused, and remarked how fertile publication imagination was when it wished to invent anything relating to personages in high positions; and how little may give rise to quite ridiculous and false legada. Thanks to the "lift," and to a speaking tube that communicated with the chamburs, the business of the empressituiet was executed quickly and without inconvenience.

Origin of the Jacqueminet.

Origin of the Jacqueminot.

The Jacqueminot is a trifle more fanciful in origin. An irate father siew the lover of his daughter, upon which she died of a broken heart. There was a clump of Louis Quinze rose growing by the seat where the lovers were when the general found tham. These rose bushes were red with the youth's blood and the girl's father ordered them cut away.

A Never Ending Slavery.

A Never Ending Slavery.

There is one kind of physical wear and tear in the matter of clothes which man escapes. He may work himself into a frenzy because his tailor has not finished his new dress coat in time, has made it too long in the body or too short in the skirts, or he may shatter his health in trying to satisfy the demands for sealskin and velvet of an extravagant wife, but of the ompingseant needle and the carbut of the omniprescent needle and the gar-ments which must be made, mended or alments which must be made, mended or altered he is happily oblivious. Not so with the woman. Among all classes but the very wealthy this to her is a never ending slavery. Women who have a multiplicity of household cares, girls who need much active exercise, tired teachers, who should feel free as air when the school room door closes behind them, shop girls salesymmen trawgriters. when the school room door closes behind them, shop girls, saleswomen, typewriters, all spend hours of painful struggle over sewing when they should be exercising, reading or sleeping. A specter of unfinished garments follows them everywhere, and the pathetic phrase, "I have such piles of sewing to do," is always on their lips. An enormous amount of female vitality is wasted in this manner.—Lucy M. Hall, M. D.

Parisian Read Gear.

Mme. Weatherby, a noted London milliner, asserts that the most excellent and refined aste in head gear is now reigning supreme in Paris. The days of formidable towering in Paris. The days of formidable towering feathered monstrosities are past, and the new bonnets are most simple and unexaggerated. The modern theatregoer should doff his hat to Dame Fashion, who has abolished the Eiffel tower tendency and established the reign of what might be called the Queen Anne style of architecture in bonnets. The nearer a hat or bonnet resembles the provent me style of architecture in bonness, earer a hat or bonnet resembles the prover the more correct and swell it i nearer a hat or bounet resembles the prover-bial pancake, the more correct and swell it is considered. In toques only the slightly ruffled brim, and in large hats only the rib-bons, are slightly raised, and bewitching little low capotes are raised a little by the upward slant of a stiff wing. Brims of a different color from the crowns are quite the thing, and, except in the few large felt shapes with low crowns and wide brims, the nar-rower they are the better.—Exchange.
