

Our Baker Has Tested The Flour You Buy

EACH day's milling of Quaker Flour must prove its baking perfection before it leaves the Quaker Mills. It undergoes hourly tests during the milling process.

It must then pass its most exacting critic—our Master Baker. From each day's milling he bakes bread. His loaves must be perfect in size, colour, texture and flavour.

Use Quaker Flour and you will always be certain of success in baking. "The happy baker uses Quaker."

Ramblers and Rinkers Win

Abbies Won First Play-off

The second double-header of the season which was staged by the local league here last Thursday night, again proved that Campbellton is abundantly blessed with fine amateur hockey material. Thursday night two fine games constituted a thoroughly enjoyable event for hockey fans and productive of some really fine amateur hockey.

The Rink Rats won from the High Schools in a shut out contest the score being 2-0 in their favor and with out any delay to the spectators the Bankers and Ramblers appeared and kept the rubber in motion for another hour. In this last game the Ramblers were victorious, winning through hard work by a score of 3-1. Both games were replete with exciting movements and the whole assembly of hockeyists showed themselves in surprising good form. On the strength of the league's advertising a few new fans attended in the previous double-header and Pete McLean refereed last Thurs. matches in an equally efficient and satisfactory way. A synopsis of the games follows:

Rinkers 2 High School 0

The Rinkers and High School boys lined up for the first match and provided an hour of genuine entertainment. Although the latter squad failed to tally a single score through the game the play was not without interest by any means, for the H. S. Boys put up a game fight for honors and were defeated only by the hard work of their opponents who kept busy every moment of the play. The contest ended with a score of 2-0 in favor of the Rinkers.

Although the contesting teams are the younger and lighter teams of the local league, this match was a fast clean exhibition of hockey replete with clever individual rushes and nifty stick-work. There are many promising hockeyists on both these squads.

The lineup follows:

Rinkers	Goal	High School
LeBlanc	Defence	Ferguson
Young	Defence	Stewart
Howard	Defence	Stewart
Anderson	Centre	Stewart
Stewart	Spares	G. Fraser

Ramblers 3—Bankers 1

The match between the Ramblers and Bankers was as fast and exciting as the one preceding it. Both squads dashed into action with the first foot of the whistle and the rubber was swept through a series of rushes and passes. After an unexciting attempt to score the Bankers, the Ramblers lost the puck near their opponents goal and had to play point for the Bankers until it started.

Elated by this success the Bankers began to show still more speed and for several minutes they had the best of the territorial play. But Jardine and McIntyre on the Ramblers defence line were alert to every charge and gave Mackenzie in goal good support. As for the goal himself he was calm and collected and apparently ready for any kind of a shot. Repeatedly he stopped dangerous drives with scarcely an effort.

But the Ramblers were playing equally fast and it was only a matter of minutes until Jardine sagged the Bankers' defence on a fast individual rush. The contest developed even more speed and with the score tied the fans showed greater interest. The Bankers continued to bombard their opponents goal and keep Jar' and McIntyre on the job but could score again. Fraser and Hadley snowed up well on the Bankers defence and Bourgeois continued to bombard their opponents goal making the score 3-1 in favor of the Ramblers.

The last period was equally fast and clean and was replete with fast rushes and snappy stick work. The Bankers put up a spirited struggle to break their opponents' lead but McIntyre and Jardine frustrated their most promising rushes. To pick one or more individual stars in the match would be not only impossible but unfair. Every man played a true game and the contest was an exhibition of first class amateur hockey all the way through.

The lineup follows:

Ramblers	Goal	Bankers
McKenzie	Goal	Bourgeois
McIntyre	C. Point	Fraser
Jardine	Point	Hadley
Dunham	Centre	H. Henry
G. Dewar	R. W.	H. McNeil
D. Murray	L. W.	McBeath
A. Metzler	Spares	W. Currie

TELLS HOW TO CONSTRUCT HOTBED

The Way to Grow Lettuce and Other Plants At Home.

(Issued by the Director of Publicity, Dominion Department of Agriculture, Ottawa, February 29th, 1922.)

Garden crops such as tomatoes, cabbage, lettuce and celery, can be greatly advanced in the spring by the use of hotbeds. On the farm the making of such a bed is a simple matter because of the presence of manure of a suitable kind. Whereas the greenhouse has to depend on steam heating for the necessary warmth, the heating for a hotbed is secured from that arising from fresh manure. The hotbed may be placed on top of the ground or in an excavation. Which ever plan is decided upon, the site chosen should drain so as to not permit water to stand. If the bed is to be placed on top of the ground, a plan is adopted, the soil should be taken out to a depth of about 18 inches and for about three feet wider than the frame, so that there be room for banking up outside the frame. The banking is very important as it conserves the heat. Horse manure is the best. It should be turned over twice, and should be quite hot and ready for in five or six days.

To support the glass sash, a simple frame should be made of two long planks. It should be so constructed that it may be raised if the plants get too close to the glass. To provide for the shedding of rain, the back of the frame should be six inches higher than the front.

When building the bed, the manure should be shaken so that the long and short particles are well mixed. Tramp well as each layer is added, until a depth of two to two and a half feet is secured. The frame is then put in position and five or six inches more manure is shaken in. Good soil to the depth of six inches should now be placed under the manure, the Kelly put on. In five or six days the hot bed will be ready for the seed. A thermometer should be used and the temperature of the soil should not exceed 80 degrees. The seeding should be done in rows about four inches apart as it could in the open ground later in the season.

More complete instruction for handling the cold frame and the plants themselves are contained in Exhibition Circular No. 16, obtainable from the Agriculture, Ottawa.

FORESTRY EXPERTS COMING TO N.B.

A Second Empire Forestry Conference to Be Held in Canada.

A grant of \$3,000 has been approved by the Provincial Government for the expenses of the Second Empire Forestry Conference, which is to be held in the Dominion this year, the tentative date for the opening at Ottawa being July 25th.

Already the provinces of British Columbia has voted the sum of \$5,000 for the expenses of the conference, while Quebec and Ontario have voted \$7,000 each. The amount set aside by the Federal Government, for the Conference is \$20,000.

Among the noted visitors who will be in attendance at the conference are other members of the commission in Ottawa, and later a tour of Western Canada will be made by the Imperial Forestry Research Institute, and an international authority on silviculture. In addition the following assignment of delegates has been made: Great Britain, Australia, India, New Zealand, Newfoundland, South Africa, 2, Crown Colonies 10, Canada 7.

The arrangement for the programme are in the hands of the committee composed of Canadian foresters under the direction of the Federal Empire Forestry Conference was held three years ago in England, when it was decided that the second conference should be held in Canada. Beneficial results are anticipated, especially in obtaining co-ordinated information on the timber supplies of the various colonies leading to more advantageous marketing and conservation within the Empire.

MOTORLESS PLANE REMAINS IN AIR NEARLY 22 HOURS

Biskra, Algeria, Feb. 23.—When the motorless airplane, which was shot yesterday, the first award was given to the French aviator, Major Desamps, for his starting point, and his total flying time was 21 hours, 48 minutes, 43 seconds. It was said that in the last six months remarkable progress has been made in Biskra in motorless flying.

GERMAN RESISTANCE.

Berlin, Feb. 21.—The Minister of Railways has instructed that German railway administration to cut the supplies of gas, water and electricity at all stations under French or Belgian military control.

The Prussian Minister of the Interior has forbidden the Ruhr police to appear on duty without their uniforms or weapons. It is believed that the occupation authorities from organizing an unarmed and uniformed police force.

HOW MANY HENS DO YOU KEEP?

Did you ever stop to think of the advantages you could derive by keeping 50 to 100 hens on your farm? Perhaps you have tried to keep that number already, and have failed to get any return. If so, there was a reason for your failure, and perhaps more than one. Well-managed flocks in New Brunswick have made money for their owners, and there is no reason that each and every one of us who make an attempt at Poultry Keeping should not make the poultry pay.

What gross revenue could we expect from 100 hens kept under conditions in Northern New Brunswick? Here is an estimate of what gross revenue can be derived from a flock of 100 pure-bred average hens:

800 doz. eggs @ \$25 per doz.	\$200.00
50 old hens @ 1.25 each	62.50
10 cockerels @ 1.50 each	15.00
40 cockerels @ 1.50 each	60.00
100 chickens @ 1.00 each	100.00
(broilers), etc.	\$517.50

These figures are based on the following:

100 hens should lay an average of 8 dozen eggs per year, per hen, and still allow sufficient eggs from them to rear 300 chickens; 50 pullets each will be required to replace one half of the flock disposed of as old hens; some cockerels also will be required for breeding purposes.

A local flock of 120 hens inspected some time ago by the writer showed improvement, good management and selection can do. Daily egg records of the flock kept during the past two years showed the following comparison.

In 1921, 120 hens lay an average of 90 eggs each. During the fall of 1921 only 50 hens were culled out and were replaced by young pullets. In 1922, 120 hens lay an average of 123 eggs each, this was an increase of 33 eggs per hen, or, @ 35c per dozen, an increased revenue of 96c per hen, or \$106.20 more for the same flock, kept on practically the same expense for feed and management in 1922 as in 1921.

Now what are the marketing prospects for poultry in Northern New Brunswick? They are practically unlimited. What the local will not absorb, the Dominion Live Stock Branch at Moncton will gladly help the farmers to ship co-operatively. Many car load lots have already been shipped from other sections of the Province, and there is no reason why the farmers of the north cannot busy this season and keep enough poultry to not only supply the local demand but also to ship a car load of live poultry next fall.

Any further information on the subject of poultry keeping or marketing can be obtained from the Agricultural Office at Bathurst.

THE ROOSTER

The rooster is a luscious bird. In all the land his voice is heard. A proud and haughty bird by heek Who flaps his wings and curves his neck.

From east to west from pole to pole, His morning bugle echoes roll, Arousing men from morning sleep And merrymen from their beauty sleep. He hunts for worms with main and might, And finding one, with huge delight, To whet his harem's appetite, He calls his wives with trill and hum.

He eats it up before they come. New whether Red or Plymouth Rock, One half is he of all the flock. And chickens mostly favor dad

But when the hatching season's over We must restrain this gallant rooster, Must shut him up in lonely state

Their eggs will thus repay our toil When fertile ones would quickly spoil. The man who'd be a fresh egg booster, Must segregate the old he-rooster.

BOB ADAMS

Hence Golf Widows. "Your husband is a fine player. His golf his profession?" "No, his obsession."

A HOT TIME

They arrived home late from the party. Wifey took off her hat and slammed it down. Then she confronted her husband.

"I'll never take you to another party as long as I live! she said.

"Why, he calmly wanted to know.

"You asked Mrs. Jones how her husband has been standing the heat."

"Well, her husband has been dead two months."

"HAD A NARROW ESCAPE"

"I never realized until a few months ago how risky it is to neglect a cold in the chest. I have always had such good health, that a cold either in the head or chest, while unpleasant, never gave me any worry. Outside an occasional cold, I had never known what it was to be laid up even for a day in all my life, until last December. One afternoon I got a chill and no matter how close I got to the stove, I couldn't seem to get warm. This chill was followed by a cold in my chest. As usual I neglected it and it kept getting worse and worse. Finally I had to go to bed and send for the doctor. His examination showed that I had pneumonia and a bad case at that. By careful nursing on the part of my husband, my children and some friends, I managed to pull through, but the doctor told me I had a narrow shave. And here's where my troubles began. While I was now out of danger, I was anything but well. I was still very weak from the effects of the pneumonia. Although I had lots of life and energy before my sickness, I was now worn out tired all the time. I slept fairly well, more because I was exhausted. But my sleep didn't refresh me because, while I appeared to be asleep, I was conscious most of the time of what went on around me. Although all kinds of tempting dishes were prepared for me, I had no relish for food. This sickness had already undermined my health to such an extent that I was a living skeleton. I was getting discouraged as nothing I took seemed to do me any good. I wondered if Carmel wouldn't build you up, a friend said one day. It did me a world of good. I was completely run down and you can see for yourself how well I look today. Why don't you try it? Thanks to this friend's advice I am in perfect health again, as healthy and as full of life and vitality as I have ever been."

Carmel is sold by your druggist, and if you can conscientiously say, after you have tried it, that it hasn't done you any good, return the empty bottle to him and he will refund your money.
