A. BUSBY.

General Passenger Agent.

GEO. TAYLOR,

General Freight Agent.

D. POTTINGER.

Railway Office, Monotou, N.B., Feb. 1st, 1886.

Chief Superintendent.

#### AMERICAN

### ELECTRIC MANUFACTURING CO.

EXECUTIVE OFFICES:-- Western Union Telegraph Co.'s Building, Cor. 23rd St. and 5th Ave.

This Company is now engaged in the manufacture of the most complete, economical and efficient system of Electric Arc Lighting ever invented, and will Contract to Construct and Install Complete Central Stations for lighting Cities and Towns under the well-known

### AMERICAN SYSTEM OF ELECTRIC ARC LIGHTING.

Special Advantages of this System. Completeness, durability, steadiness, quality of light and sconomy of power. The Wood dynamo-electric generator occupies less space, is lighter, requires less motive-power, and coats less than others capable of producing an equal number of lights. There is no FIEING OR FLASHING OF THE COMMUTATOR, and consequently less less of energy and wearing of the parts from this cause than is the case with other machines. It requires no oiling to other attention than to be kept clean, and its extreme simplicity enables it to be operated with the minimum of skill and attention. The corrent regulator and signaling apparatus, by which the machine is made to generate the exact corrent required for any number of lights from one to so full capacity—as they are turned off and on without change of speed or wester of power—is simple, effective, and safe. Its lamps are reliable in operation, the carbon regulating mechanism being absolute in its control, durable, and qualificated by cheages of temperature or weather. They are of ornamental derign, and the steadances and purity of light produced are unequalled at the same expenditure of power.

Special Attention given to installing Isolated Plants for Mills, Factories, Shops, Railroad Buildings, and other Buildings where large spaces are to be illuminated.

Zedimetes Furnished for building Complete Central Lighting Stations of any capacity for Arc Lighting alone, or for ELECTRIC ARC LIGHTING, COMBINED WITH ESTABLISHED OR PROSPECTIVE GAS PLANTS.

A Combination Plantin and Gas Plant is semible and business-tike. Some of the most successful and progressive Gas Companies n the world are already adopting this plan with satisfaction to their customers and profit to the possives
