### The Last Line of Defence

for many a man is his insurance policy, and if it be in the CANADA LIFE that defence may be greatly strengthened by applying his dividends to relieve the burden of payments in his later years.

In many cases Canada Life dividends have cancelled the premiums, and turned an expense into a source of revenue.

#### For Example

Under Canada Life policy No. 13,813 dividends have been applied as a life annuity towards paying the premium of \$42. In the past five years the annuity was \$44.94, paying the premium and leaving a margin of \$2.94. In the next five years all premiums will be paid by profits and there will be a yearly cash return of \$18.04 besides. This annuity is guaranteed for life and will be further increased every fifth year.
