

If you or any of your family are troubled with
Worms, use Dr. M'LANE'S
Celebrated Vermifuge !

NO diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by *worms in the stomach and bowels*. When the sufferer is an adult, the cause is very frequently overlooked, and consequently the *proper remedy* is not applied. But when the patient is an infant, if the disease is not *entirely neglected*, it is still too frequently ascribed, in whole or part, to some other cause. It ought here to be particularly remarked, that although but *few worms* may exist in a child, and how quiescent soever they may have been previously, no sooner is the constitution invaded by any of the *numerous train of diseases* to which infancy is exposed, than it is *fearfully augmented* by their irritation. Hence it too frequently happens that a disease otherwise easily managed by *proper remedies*, when aggravated by that cause, bids defiance to treatment, judicious in other respects, but which entirely fails IN CONSEQUENCE OF WORMS BEING OVERLOOKED. And even in cases of greater violence, if a *potent and prompt remedy* be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies evenhanded, and *with success*.

SYMPTOMS WHICH CANNOT BE MISTAKEN.

The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure semicircle runs along the lower eyelid; the nose is irritated, swells, and sometimes bleeds, a swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saliva; slimy or furred tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a gnawing sensation of the stomach, at others, entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently tinged with blood; belly swollen and hard; urine turbid; respiration occasionally difficult and accompanied by hiccough; cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c. Whenever the above symptoms are found to exist, DR. M'LANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to

RETURN THE MONEY

In every instance where it should prove ineffectual; "providing the symptoms attending the sickness of the child or adult warrant the supposition of Worms being the cause." In all cases the Medicine to be given IN STRICT ACCORDANCE WITH THE DIRECTIONS.

We pledge ourselves to the public that *Dr. M'Lane's Vermifuge DOES NOT CONTAIN MERCURY* in any form; and that it is an innocent preparation, *not capable of doing the slightest injury to the most tender infant.*

The above valuable preparation, as also *Dr. M'Lane's Celebrated Liver Pills*, can now be had at all respectable Drug Stores in the United States.

Agents in Halifax—WM. LANGLEY and JOHN NAYLOR.
