ernor and Commander-in-Chief of the Province of New Brunswick, &c. &c.

May it please Your Excellency.—

The Members of the Mechanics' Institute of Saint John cannot permit of Your Excellency's departure from their shores without an expression of gratitude for the warm interest You have always taken in the satablishment and welfare of their Institution.

Totally unconnected with political questions and uninfluenced by party feeling, it has for its sole object the intellectual and moral improvemement of our People, the development of the yet infant reasources of our Province, and the encouragement of Talents, of Studies and Pursuits, which may ultimately, though gradually, lead to increased happiness and prosperity.

That under these circumstances, and with such views, Your Excellency should have warmly exerted Yourself in its behalf, is not surprising.—Science, Literature and the Arts have always been fostered by the Genius of the British Constitution; and the germ, thus early nurtured by Your Excellency's care, will doubtless expand, in time, to the vigiours dimensions of the full-grown Tree, yielding the rich product of its ripened fruit to all who will gather from its boughs.

We have little to offer Your Excellency but our thanks. The consciousness of having done a noble act is its own reward. We sincerely desire for Your Excellency and Your family a side and pleasant voyage home, and in thus briefly bidding You farewell, we fondly hope that, hercafter, it may not be among the least pleasing recollections of Your distinguished cover, that You will be long remembered with gratitude by an Institution, aiming solely at the happiness and improvement of that portion of Her subjects, over which the Queen had deputed You to preside.

Gentlamen, the feed to address to which the occasion evived by you with who hat endeavon concerns your welfs. I have said on a this Province who few inhabitants in to comparatively smatch elements of imparting the comparatively smatch elements of imparting the comparatively smatch elements of imparting the comparatively smatch elements of influence and the influence and the comparatively smatch with the comparatively smatch elements of the comparative of the comparative of the control of the cont
