IT ALL DEPENDS
ON THE LIVER

So important is the liver and so great is its influence on the other vital organs of the body that it may be said you have little to fear from the ordinary ills of life so long as the liver is in healthful working order. The digestive processes are so dependent on free action of the liver that any derangement of this organ soon brings trouble.

Biliousness and constipation follow, with headache and depressed spirits. Additional work is thrown on the kidneys, and soon the whole eliminating system is deranged and the blood carries poisons through the body. Careful eating is a great help towards keeping the liver right, but when it does get wrong there is nothing like Dr. Chase's Kidney-Liver Pills to restore the liver to healthful action.

With the secretion of bile by the liver, constipation and biliousness are cured, and the digestive and excretory systems are set in order. It is wonderful the benefit obtained by a few doses of Dr. Chase's Kidney-Liver Pills under these circumstances. A trial will convince you of their superior merit.
